K. R. Parthasarathy is a professor emeritus of graph theory from the Department of Mathematics, Indian Institute of Technology Madras, Chennai. He received his Ph.D. (1966) in graph theory from the Indian Institute of Technology Kharagpur. Parthasarathy is known for his work (with his student G. Ravindra) proving the special case of the strong perfect graph conjecture for claw-free graphs.

positive integer $k \geq 2$, let X be any set of cardinality $2k - 1$ and \mathcal{V} , the collection of all $(k - 1)$ -subsets of X . The odd graph O_k has \mathcal{V} as its vertex set, and two vertices of O_k are adjacent if and only if the corresponding $(k - 1)$ -subsets are disjoint. It is well known that O_3 is the Petersen graph.
