Android - Nougat

Android Nougat is the seventh major version and 14th original version of the Android operating system. First released as an alpha test version on March 9, 2016, it was officially released on August 22, 2016, with Nexus devices being the first to receive the update. The LG V20 was the first smartphone released with Nougat. Nougat introduces notable changes to the operating system and its development platform, including the ability to display multiple apps on-screen at once in a split-screen view,

Android Nougat - Wikipedia
Android Nougat provides a solid number of new features. It's not feature-packed, expanding on the Android base in many ways no one could have expected. But neither is it a slim and prim update, focused on less tangible matters like responsiveness or security. (Although as we'll discuss later, Nougat does improve Android's security)
