Apache Kafka Apache Mesos

Kafka also plays a key role in integrating various systems in a company's data center. Apache Mesos abstracts away data center resources to make it easy to deploy and manage distributed applications and systems. This post explains how to run Kafka clusters on Mesos to simplify the task of managing stream data at scale.

---

Making Apache Kafka Elastic With Apache Mesos - Confluent

Apache Kafka and Apache Mesos are very well-known and successful Apache projects. Both have large communities supporting them and companies -- Confluent and Mesosphere, respectively -- built around them. Recently, the two companies worked together to make Kafka one of the first certified services on Mesosphere's Datacenter Operating System.

---

## Making Apache Kafka Elastic With Apache Mesos | D2iQ

Apache Mesos Scheduling and Task Execution. In the initial implementation of this, Apache Mesos will be tested to create this abstraction and an implementation of a Kafka-Mesos project that will bridge/glue them together. The tested code for the kafka.mesos implementation will be under <https://issues.apache.org/jira/browse/KAFKA-1207>

### Apache Mesos and Kafka Streams for Highly Scalable ...

Apache Flink ships with multiple Kafka connectors: universal, 0.10, and 0.11. This universal Kafka connector attempts to track the latest version of the Kafka client. The version of the client it uses may change between Flink releases. Modern Kafka clients are backwards compatible with broker versions 0.10.0 or later.

### Apache Kafka

Slides from my talk about using Mesos to run persistent services like Apache Kafka, Apache HDFS, Apache Accumulo on Apache Mesos with Marathon. Slideshare uses cookies to improve functionality and performance, and to provide you with relevant advertising.

---

### Apache Kafka, HDFS, Accumulo and more on Mesos

We can have a command line `bin/kafka-mesos-scheduler-start.sh` that would build the contrib project if not already built and support `conf/server.properties` to start. The Framework and operating Scheduler would run in on an administrative node. I am probably going to hook Apache Curator into it so it can do its own failure to a another follower.

---

### [KAFKA-1207] Launch Kafka from within Apache Mesos - ASF JIRA

The goal of this project is to provide mesos framework that allows to deploy and manage cluster(s) of Kafka brokers. User is provided with a CLI to control broker configuration of running scheduler. Overview. Following components are involved in the implementation: Master daemon and slave daemon are part of mesos distribution.
