Freesciencelessons is the most viewed GCSE Science channel on Youtube and has helped countless students to achieve or exceed their expectations in their GCSE Science exams. This is the companion workbook for the GCSE Combined Science Foundation Biology 2 videos for the AQA specification. Written by Shaun Donnelly (who appears in every video), this book contains hundreds of questions to guide students through the course. Accompanied by detailed on-line answers, this is the perfect resource for every student following the AQA specification. Every topic is covered in depth, including all the required practicals. A specimen exam paper is also included, allowing students to check their progress across the subject.

Written to support and enhance assessment alongside the pupil texts, these resources offer a range of material for the AQA specification. They provide test questions for each chapter together with detailed mark schemes to make assessment easy. Two versions of each question are provided, one allows pupils to write their answers in the spaces provided and the other requires pupils to have separate writing paper. Questions can be grouped according to needs. Master grids are provided to cut and paste tests together in a consistent format to use the resource in any order. Chapter tests can be grouped to form a module test after chapters. End-of-chapter examinations can also be produced in this way. A free non-calculator supplement organised by unit/chapter is also included in this resource.

Suitable for both Foundation and Higher students, this textbook follows the structure and content of AQA B from September 2001. It integrates key skills and ICT as well as geographical skills. Summary sections at the end of each chapter focus students on revision and exam practice.

Written by two experienced psychology teachers and examiners, this textbook provides thorough coverage of both the AQA and OCR GCSE Psychology specifications. The user-friendly layout clearly identifies which sections are pertinent to each specification. The book is produced in attractive full colour with plenty of photographs, pictures and cartoons, and provides a variety of student-friendly features, including: A list of the AQA and/or OCR specification requirements for each topic An everyday-life case study to introduce each chapter Numerous classroom activities Key terms highlighted and defined throughout the text Aims and Learning Outcomes, which highlight the general themes and processes (including why psychology matters, how psychology works, everyday life, ethical issues, diversity, critical thinking and methodology) Research studies with evaluations Clear and concise chapter summaries Exam hints and tips Exam-style questions. This new edition is accompanied by a set of online multimedia resources, including powerpoint lecture courses and multiple-choice questions tests, available free-of-charge to schools who adopt this book as their text.

Prepare students for the AQA GCSE (9-1) Food Preparation and Nutrition exams with this photocopiable pack, including two full exam-style practice papers and detailed mark schemes with sample answers. - Get ready for the exams with practice papers that replicate the types, wording and structure of the questions students will face. - Guide students through what's required for each question by looking at sample answers that indicate where and how marks were awarded. - Provide an easy solution for mock exams, practice, revision and homework; detailed mark schemes for each question help to reduce marking time and provide opportunities for self- and peer-assessment. - Improve your feedback to students with marking guidance for extended response questions.

Written by senior examiners to meet the AQA/B specification, this text aims to help both higher and foundation students develop skills needed for the exam. It has sample questions, guidance on how to answer them and practical advice on how the exam will be marked and what examiners are looking for.

This GCSE revision guide for English and English literature contains updated content in line with the latest curriculum changes. It has in-depth course coverage, with tips, key points and progress check panels. Sample questions with model answers are included.

Quantitative corpus research on written language development has expanded rapidly in recent years, assisted by the ever-increasing power and accessibility of

software capable of reliably analysing huge collections of learner writing. For this work to reach its full potential, it is important that researchers have a strong understanding of its methodological foundations and of the existing empirical evidence base on which it can build. This book provides the most comprehensive discussion to date of research in this area. Covering both first and second language learning contexts, it sets out a coherent theoretical framework and systematically reviews studies published over the last seventy years in order to establish what such research has taught us about written language development, what it hasn't taught us, and what we should do next. Timely and original, this is an essential reference work for academic researchers and students of first and second language writing.

Learning English focuses on young children's acquisition of spoken and written English in monolingual and bilingual contexts and explores the debates surrounding English in schools and colleges, and the often controversial nature of the English curriculum in different parts of the world. English is learned in most parts of the world, both through use in the home and community, and as a major language of education. Learning English represents just some of this diversity.
