ArcSight Command Center for ESM 7.3 Technical Requirements

Application logs are collected on a stand-alone Windows machine and parsed using the FlexConnector parser. Parsed events are forwarded to the ArcSight ESM where all of the data from Centrify Authentication Service, Privilege Elevation Service, and Audit & Monitoring Service is stored, and the ArcSight Console is used to access that data.

ArcSight SmartConnector Installation

ArcSight ESM collects security log data from an enterprise's security technologies, operating systems, applications and other log sources, and analyzes that data for signs of compromise, attacks or other malicious activity. The following components of ArcSight may be referred to in this document.
