Incidencias. Contacto. Introduction. Rabbit brain has been used in several works for the analysis of neurodevelopment. In this web page we provide a digital rabbit brain atlas that allows the automatic identification of brain regions, which is a crucial step for various neuroimage analyses. The delineation of the areas in the atlas has been based on magnetic resonance imaging, including both structural and diffusion weighted. 60 regions were defined, comprising cortex, white matter, and deep ...

The brain constantly transmits signals whether during idle wakefulness (i.e., "at rest") or different behavioral states like cognitively-demanding tasks. Studies using functional magnetic resonance imaging (fMRI) in humans have consistently observed neural networks of coherent activity within and between brain structures subserving some functional purpose or neuronal processing.

To the best of our knowledge, a neonatal rabbit brain atlas has not been published or made available. Its best approximation available in the literature, is the adult rabbit digital multi-atlas proposed by Mu\u00f1oz-Moreno et al. (2013). This is based on 10 multi-modal scans acquired at 3 T with anisotropic resolution (0.15 mm, 0.15 mm, 0.7 mm) and it provides 60 anatomical regions, whose borders were identified by overlaying structural and diffusion weighted imaging (DWI) derived modalities.

Brain is the main part of the nervous system. The brain lies in a protective bony box, called cranium. The brain is the anterior part of centrai nevous system, lies in the head. It is derived from embryonic ectoderm. The structural and functional units of the brian are neurons.

ST at the whole-brain scale. We generated a whole-brain molecular atlas by capturing the spatial patterns of gene expression in the adult mouse brain using ST (). We hybridized 75 coronal sections from one brain hemisphere that covered the entire AP axis onto ST arrays (Fig. 1A and fig. S1) Using a computational framework designed to generate reference maps (), we aligned each imaged brain ...
