### ~~BD Diagnostics - Preanalytical Systems~~

Blood Collection Tubes About BD's Blood Collection Tubes BD Diagnostics - Preanalytical Systems is an industry pioneer and leader in evacuated blood collection systems. Under the BD Vacutainer® Brand, we provide a range of blood collection tubes for Biochemistry, Immunochemistry, Haematology, Blood Banking and Coagulation studies.

### ~~Blood Collection Tubes - BD~~

Start with quality specimen collection to achieve better results. For more than 60 years, BD Life Sciences – Preanalytical Systems has advanced the science of specimen collection to help laboratory tests become the foundation for 70% of all medical decisions. 1. Today, the gold standard in sample collection is the BD Vacutainer® product family, which U.S. hospitals rely on to enhance their sample quality and protect their nurses, phlebotomists and other caregivers from costly accidental ...

### ~~Specimen Collection - BD~~

A Vacutainer blood collection tube is a sterile glass or plastic tube with a closure that is evacuated to create a vacuum inside the tube facilitating the draw of a predetermined volume of liquid. Most commonly used to draw the blood samples directly from the vein. These tubes can also be used sometimes for the collection of urine samples.

### ~~COLOR CODES OF VACUTAINER TUBES AND ITS USES~~

The BD Vacutainer™ system is a closed system optimally designed and tested for controlling pre-analytical variability throughout the specimen collection and handling process. BD Seditainer™ tubes are designed for ESR determination without having to use a sedimentation pipette. Whole blood is drawn directly into the evacuated glass tube. Tubes are mixed by inverting the tube 180° and back, 8-10 times.
