This comprehensive and well known textbook deals with the characteristics, classification and life cycle of different species of fungi. While it provides a detailed account of bacteria, viruses, mycoplasma and lichens, it also discusses elementary plant pathology.

The sixth edition of Botany for Degree Students presents a revision of the whole text, including the rewriting of many portions and the addition of several new topics on the basis of recent researches. It covers as far as possible the prescribed syllabuses of several Indian universities. This enlarged edition should meet the needs of degree students not only in India but abroad as well.

This textbook has been designed to meet the needs of B.Sc. First Semester students of Botany as per the UGC Choice Based Credit System (CBCS). It acquaints students with general characteristics, classification and economic importance of various divisions of biodiversity i.e., Microbes, Algae, Fungi and Archegoniate. While it provides strong conceptual understanding of the subject, it also helps in developing scientific outlook of the student.

The present book is for B.Sc(I) yr, strictly based on UGC Model syllabus for all Indian Universities. Each unit or chapter as the case may be is followed by various types of questions, such as very short, short, long answer questions, digrammatic questions and multiple choice questions, asked repeatedly questions have been included.

This textbook has been designed to meet the needs of BSc Fourth Semester students of Botany as per the UGC Choice Based Credit System (CBCS). It acquaints the students with plant-water relations and throws light on mineral nutrition. It also covers translocation in phloem, photosynthesis, respiration and enzymes. In addition to these, the book also deals with the nitrogen and lipid metabolism, plant growth regulators and plant response to light and temperature. While it provides strong conceptual understanding of the subject, it also helps in developing scientific outlook of the student.

This textbook has been designed to meet the needs of BSc Second Semester students of Botany as per the UGC Choice Based Credit System (CBCS). It acquaints students with abiotic and biotic components of the ecosystem and their interactions at different levels. It also covers origin of angiosperms, their phylogeny and classification using various methods. While it provides strong conceptual understanding of the subject, it also helps in developing scientific outlook of the student.

For the students of undergraduate and postgraduate students. All the diagrams have been made of several colours making these more attractive. As per the new format of question papers , three types of questions -Essay type, Short answer type and Objective type Questions have been added.

Read PDF Botany Textbook For Degree Student By A C Dutta

This textbook has been designed to meet the needs of B.Sc. Third Semester students of Botany as per the UGC Choice Based Credit System (CBCS). It acquaints students with the tissue system, anatomy of stems, roots & leaves and secondary growth. It explains adaptive & protective systems and structural organization of a flower. Besides, the book also covers pollination, fertilization, development of endosperm and embryo, apomixis and polyembryony. While it provides strong conceptual understanding of the subject, it also helps in developing scientific outlook of the student.
