What is it about the brain that enables many scientists to claim brain can fully explain mind? And what is it about such neuroscientific explanations of mental experience that some philosophers reject? What seems obvious to some—the purely physical explanation of the mind—seems impossible to others.

Can Brain Explain Mind? | Closer to Truth
Well, we need mind talk because although most neuroscientists reject the idea of a mind different from brain, most civilians embrace the distinction. This competing view of things gets expressed in the real world in stark and startling ways. Take, for example, how the mind-brain dichotomy can play out in the criminal justice system.
