Interest in the study of family business has increased significantly over the last decade. The research on this subject - and the related subject of entrepreneurship - has developed in parallel within a number of different disciplines, making it the perfect candidate for an annotated bibliography. This book aims to catalog the major empirical, theoretical, and practical articles on family business. Included for each article listed are a summary of key findings, and a list of the methodologies and key conceptual models used. It also features a review of the literature, a discussion of how family businesses have been defined, and agenda for future research into both family business and entrepreneurship studies.

Forecasting is required in many situations. Stocking an inventory may require forecasts of demand months in advance. Telecommunication routing requires traffic forecasts a few minutes ahead. Whatever the circumstances or time horizons involved, forecasting is an important aid in effective and efficient planning. This textbook provides a comprehensive introduction to forecasting methods and presents enough information about each method for readers to use them sensibly.

Provides the practical concepts, entrepreneurial insights, and comprehensive resources essential for success now and throughout your management future.
