Like many other incipient technologies, Web services are still surrounded by a substantial level of noise. This noise results from the always dangerous combination of wishful thinking on the part of research and industry and of a lack of clear understanding of how Web services came to be. On the one hand,

Based on their academic and
industrial experience in middleware
and enterprise application
integration, Alonso and his co-
authors clarify the fundamental
concepts behind Web services and
present them as the natural evolution
of conventional middleware
necessary to meet the challenges of
the Web and of B2B application
integration.
