This publication provides an overview of the importing process and contains general information about import requirements. This edition contains much new and revised material brought about because of changes in the law, particularly the Customs Modernization Act. The Customs modernization provisions has fundamentally altered the process by shifting to the importer the legal responsibility for declaring the value, classification, and rate of duty applicable to entered merchandise. Chapters cover entry of goods, informed compliance, invoices, assessment of duty, classification and value, marking, special requirements for alcoholic beverages, motor vehicles and boats, import quotas, fraud, and foreign trade zones. In addition to the material provided by the U. S. Customs Service, the private commercial publisher of this book has provided a bonus chapter on how to build a tax-free import-export business.

Ten Strategies of a World-Class Cyber Security Operations Center conveys MITRE's accumulated expertise on enterprise-grade computer network defense. It covers ten key qualities of leading Cyber Security Operations Centers (CSOCs), ranging from their structure and organization, to processes that best enable smooth operations, to approaches that extract maximum value from key CSOC technology investments. This book offers perspective and context for key decision points in structuring a CSOC, such as what capabilities to offer, how to architect large-scale data collection and analysis, and how to prepare the CSOC team for agile, threat-based response. If you manage, work in, or are standing up a CSOC, this book is for you. It is also available on MITRE's website, www.mitre.org.

"Includes 8 real SATs and official answer explanations"--Cover.

The second and final guide in the PowerPoint 2010 series improves the skills learned previously as well as introducing the use of macros, hyperlinks, sound and custom animation into slides resulting in professional shows.
