and Assessment Policy Statement (CAPS) of the Department of Basic Education (DBE) The subjects in the Intermediate Phase (Grades 4,5 and 6) are: • Home Language • First Additional Language • Mathematics • Life Skills • Natural Science and Technology • Social Science Note: The Eskom guides are in English.

Study & Master Life Sciences Grade 10 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Life Sciences. The comprehensive Learner's Book includes: \* an expanded contents page indicating the CAPS coverage required for each strand \* a mind map at the beginning of each module that gives an overview of the contents of that module \* activities throughout that help develop learners' science knowledge and skills as well as Formal Assessment tasks to test their learning \* a review at the end of each unit that provides for consolidation of learning \* case studies that link science to real-life situations and present balanced views on sensitive issues. \* 'information' boxes providing interesting additional information and 'Note' boxes that bring important information to the learner's attention

Bringing together international research on nature of science (NOS) representations in science textbooks, the unique analyses presented in this volume provides a global perspective on NOS from elementary to college level and discusses the practical implications in various regions across the globe. Contributing authors highlight the similarities and differences in NOS representations and provide recommendations for future science textbooks. This comprehensive analysis is a definitive reference work for the field of science education.

School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research-informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry-based learning, which signals a definite paradigm shift from the traditional teacher-dominated to a learner-centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work, and professional development in teaching practical work. This book will be of great interest to academics, researchers and post-graduate students in the fields of science education and educational policy.

This book explores the complexities of curriculum studies by taking into account African perspectives of curriculum theory, curriculum theorising and the theoriser. It provides alternative pathways to the curriculum discourse in Africa by breaking traditions and experimenting on alternative approaches.

"What are the benefits and risks for Africa ' s participation in the globalisation nexus? Remapping Africa in the Global Space is a visionary and interdisciplinary volume that restores Africa ' s image using a multidisciplinary lens. It incorporates disciplines such as sociology, education, global studies, economics, development studies, political science and philosophy to explore and theorise Africa ' s reality in the global space and to deconstruct the misperceptions and narratives that often infantilise Africa ' s internal and international relations. The contributions to this volume are a hybrid of both ' outsider ' and ' insider ' perspectives that create a balanced critical discourse that can provide ' standard ' paradigms that can adequately explain, predict, or prevent Africa ' s current misperceptions and myths about the

African ' crisis ' and ' failure ' status. The authors provide a holistic, and perhaps, anticolonial and anti-hegemonic perspective that can benefit a wide spectrum of academics, scholars, students, development agents, policy makers in both governmental and non-governmental organisations and engage some alternative analyses and possibilities for socio-politico and economic advancement in Africa. The book provides up-to-date scholarly research on continental trends on various subjects and concerns of paramount importance to globalisation and development in Africa. " The book is brilliant! Remapping Africa in the Global Space: Propositions for Change explores Africa from the perspective of academics specialised in subject matters pertaining to the continent. In this age of globalisation, I find this book invaluable. It is a good read as it dissects analyses and presents issues affecting the continent in an articulate and cogent way. I highly recommend its use in academic institutions! " – Magnus Mfoafo-M ' Carthy, Assistant Professor, Lyle S. Hallman Faculty of Social Work; Fellow of Tshepo Institute for the Study of Contemporary Africa, Wilfrid Laurier University, Kitchener, Canada " More than anything else, Remapping Africa in the Global Space: Propositions for Change speaks to the complex, multifaceted, and interfused character of the development challenges and prospects of Africa. Indeed, few books have examined contemporary Africa as comprehensively and insightfully as this edited volume; it is widely welcomed in the African academic, scholarly and research arena. " – Joseph Mensah, Professor of Geography, York University, Toronto "

This book is made up of a selection of writings from an international team of scholars, highlighting the contribution made to the field of educational policy and educational policy research by Basil Bernstein's work on the sociology of pedagogy. These contributors explore, analyse and engage with contemporary political reforms of education, contemporary pedagogic debates and the changing nature of professional knowledge, relationships and structures. The subjects covered include: particular concepts such as voice research the significance of social class in relation to the language, schooling and home cultures differences between official and pedagogic recontextualising fields formation of different types of identities the construction of the learner formation of teacher identities and use of pedagogic discourses analysis of performance-based educational reforms and its impact on pedagogy.

Now fully updated in its fourth edition, Science Learning, Science Teaching offers an accessible, practical guide to creative classroom teaching and a comprehensive introduction to contemporary issues in science education. Aiming to encourage and assist professionals with the process of reflection in the science classroom, the new edition re-examines the latest advances in the field and changes to the curriculum, and explores the use of mobile technology and coding, and its impact on ICT in science education. With extra tasks integrated throughout the book and a brand new chapter, ' Working scientifically ' , to help develop learners ' investigative skills, key topics include:

- The art and craft of science teaching.
- The science curriculum and science in the curriculum.
- Planning and managing learning.
- Inclusive science education.
- Laboratory safety in science learning and teaching.
- Language and numeracy in science teaching and learning.
- Computers and computing in science education.
- Citizenship and sustainability in science education.

Including points for reflection and useful information about further reading and recommended websites, Science Learning, Science Teaching is an essential source of support, guidance and inspiration for all students, teachers, mentors and those involved in science education wishing to reflect upon, improve and enrich their practice.

This edited book aims to provide a global perspective on socioscientific issues (SSI), responsible citizenship and the relevance of science, with an emphasis on science teacher education. The volume, with more than twenty-five contributors from Africa, North and South America, Asia, Australasia and Europe, focuses on examples from in- and pre-service teacher training. The contributors expand on issues related to teachers ' beliefs about teaching SSI, teachers ' challenges when designing and implementing SSI-related activities, the role of professional development, both in pre- and in-service teacher training, in promoting SSI, the role of the nature of science when teaching SSI, promoting scientific practices through SSI in pre-service teaching, and the role of indigenous knowledge in SSI teaching. Finally, the book discusses new perspectives for addressing SSI in teacher education through the lens of relevance and responsible citizenship.
