These interactive lessons and activities cover the basics of prenatal care, what delivery is like, how one may feel after giving birth, relationship between a child's mental development and influences on his life.

The classic study of human nature which depicts the degeneration of a group of schoolboys marooned on a desert island.

Jack London's "The Call of the Wild" has been broken down into several books. In this series, there will be a book for every chapter. This is Weekly #5, which is the 5th chapter(The Toil of Trace and Trail) of The Call of the Wild. Be sure to look for your favorite chapters from this classic story. "The Call of the Wild," set in the late 1800s, takes the reader on an interesting adventure during the 1890s Klondike Gold Rush. Enjoy London's imagination as you discover what life was like for an in-demand dog during those times and how this dog responded to the challenges laid before him.

Tailored to mirror the AP Statistics course, "The Practice of Statistics" became a classroom favorite. This edition incorporates a number of first-time features to help students prepare for the AP exam, plus more simulations and statistical thinking help, and instructions for the TI-89 graphic calculator."

Implement standards-based grading practices that help students succeed! Classroom assessment methods should help students develop to their full potential, but meshing traditional grading practices with students' achievement on standards has been difficult. Making lasting changes to grading practices requires both knowledge and willpower. Discover eight guidelines for good grading, recommendations for practical applications, and suggestions for implementing new grading practices as well as: ? The why's and the how-to's of implementing standards-based grading practices ? Tips from 48 nationally and internationally known authors and consultants ? Additional information on utilizing level scores rather than percentages ? Reflective exercises ? Techniques for managing grading more efficiently

A comprehensive manual for pre- and in-service ESL and EFL educators, this frontline text balances insights from current reading theory and research with highly practical, field-tested strategies for teaching and assessing L2 reading in secondary and post-secondary contexts. Teaching Readers of English: provides a through yet accessible survey of L2 reading theory and research addresses the unique cognitive and socioeducational challenges encountered by L2 readers covers the features of L2 texts that teachers of reading must understand acquaints readers with methods for designing reading courses, selecting curricular materials, and planning instruction explores the essential role of systematic vocabulary development in teaching L2 literacy includes practical methods for assessing L2 students' proficiency, achievement, and progress in the classroom. Pedagogical features in each chapter include questions for reflection, further reading and resources, reflection and review questions, and application activities.

The writer of the Book of Hebrews takes everything the Jew of his day held dear and compares it to Christ. Needless to say, it is all found shamefully wanting. The thing that was perhaps the dearest to these Hebrews was the Old Testament priesthood, which included the Temple, its sacrifices, and the priests in all their glory. The writer of Hebrews shows Christ to be a better Priest, His sacrifice to be supreme, and the place where He renders His services to be the greatest. He shows the Priesthood ministry of Jesus to be flawless and a perfect alternative to a worn-out system that could never meet the needs of mankind.You will find The Perfect Priest refreshing and enlightening as well as inspiring.

Paramedic Pearls of Wisdom, Second Edition is a collection of rapid-fire questions and answers to help students prepare for paramedic state and national certification and refresher exams. It consists of pearls -- succinct pieces of knowledge in a question and answer format. Designed to maximize test scores, Paramedic Pearls of Wisdom prunes complex concepts down to the simplest kernel. Paramedic Pearls of Wisdom is written in direct correlation to the U.S. DOT 1998 EMT-Paramedic National Standard Curriculum. Objectives are covered in the order and manner in which they appear in the curriculum. This is an excellent study guide for paramedic students going through initial or refresher paramedic training.

(Key topics: static electricity, electric charge, lightning, electric potential, electric current, Ohms Law, Humphry Davy, sodium metals, lithium, sodium, beryllium, magnesium, calcium, strontium, barium, radium, periodic laws) IPC consists of twelve chapters of text and twelve companion student activity books. This course introduces students to the people, places and principles of physics and chemistry. It is written by internationally respected scientist/author, John Hudson Tiner, who applies the vignette approach which effectively draws readers into the text and holds attention. The author and editors have deliberately avoided complex mathematical equations in order to entice students into high school level science. Focus is on the people who contributed to development of the Periodic Table of the Elements. Students learn to read and apply the Table while gaining insight into basic chemistry and physics. This is one of our most popular courses among high school students, especially those who have a history of under-performance in science courses due to poor mathematical and reading comprehension skills. The course is designed for two high school transcript credits. Teachers may require students to complete all twelve chapters for two transcript credits or may select only six chapters to be completed for one transcript credit for Physical Science, Physics, or Chemistry. Compliance with state and local academic essential elements should be considered when specific chapters are selected by teachers. As applicable to local policies, transcript credit may be assigned as follows when students complete all 12 chapters: Physical Science for one credit and Chemistry for one credit, or Integrated Physics and Chemistry for two credits. (May require supplemental local classes/labs.)
