chemistry, toxicology,

immunology, and

laboratory statistics to

be successful

pathologists, as well as

to pass the American

Board of Pathology

examination. Clinical

chemistry, however, is a

topic in which many

Read Free

Clinical

senior medical students and pathology residents face challenges. Clinical Chemistry, Immunology and Laboratory Quality Control meets this challenge head on with a clear and easy-to-read presentation of core topics and detailed case studies that illustrate the application of clinical chemistry knowledge to everyday patient care.

Read Free Clinical

This basic primer offers practical examples of how things function in the pathology clinic as well as useful lists, sample questions, and a bullet-point format ideal for quick pre-Board review. While larger textbooks in clinical chemistry provide highly detailed information regarding instrumentation and

Read Free

Clinical

statistics, this may be too much information for students, residents, and clinicians. This book is designed to educate senior medical students, residents, and fellows, and to "refresh" the knowledge base of practicing clinicians on how tests are performed in their laboratories (i.e., method principles, interferences, and

Read Free

Clinical

limitations). Takes a practical and easy-to-read approach to understanding clinical chemistry and toxicology. Covers all important clinical information found in larger textbooks in a more succinct and easy-to-understand manner. Covers essential concepts in instrumentation and
