Conflict Revolution Mediating Evil War Injustice And ...

"The Dance of Opposites: Explorations in Mediation, Dialogue and Conflict Resolotion Systems Design" explores a new vision for conflict resolution, a "conflict revolution" that analyzes the use of language in conflict, the narrative structure of conflict stories, and how the brain responds to conflict. It surveys religion, spirituality, and meditation, and searches for ways of opening heartfelt communications between opponents.

Sadly the highest percentage of human beings pass through their life in what is ...

This book presents a conceptual and empirical analysis of the UN-led multiparty mediation in the Tajikistan conflict. Multiparty mediation has been a significant research topic of international conflict management since the 1990s, but in-depth case studies on the peacemaking dynamics of violent conflicts are rare, particularly in regard to third-party roles. This volume addresses that gap in the literature by examining the multiparty mediation of the Tajikistan conflict, a largely forgotten but notably successful case of UN-orchestrated peacemaking in the post-Cold War era. It argues that several interrelated factors contributed to the "success" of the Tajik multiparty mediation: Russia, Iran, and other major interveners shared a common interest, and reached a broad consensus on the terms of settlement; the UN was widely accepted as a lead coordinator by other mediators, and succeeded in constructively engaging with them; as a consequence, there arose positive interconnections between different third-party roles. The book presents an analytical framework for understanding the complex interplay of these factors, not only to evaluate the Tajik case but also to help clarify policy implications for multiparty mediation in other cases of violent conflict, particularly civil wars. This book will be of much interest to students of conflict resolution, civil wars, international mediation, the UN, Central Asian politics, and International Relations.

This book presents a conceptual and empirical analysis of the UN-led multiparty mediation in the Tajikistan conflict. Multiparty mediation has been a significant research topic of international conflict management since the 1990s, but in-depth case studies on the peacemaking dynamics of violent conflicts are rare, particularly in regard to third-party roles. This volume addresses that gap in the literature by examining the multiparty mediation of the Tajikistan conflict, a largely forgotten but notably successful case of UN-orchestrated peacemaking in the post-Cold War era. It argues that several interrelated factors contributed to the "success" of the Tajik multiparty mediation: Russia, Iran, and other major interveners shared a common interest, and reached a broad consensus on the terms of settlement; the UN was widely accepted as a lead coordinator by other mediators, and succeeded in constructively engaging with them; as a consequence, there arose positive interconnections between different third-party roles. This book will be of much interest to students of conflict resolution, civil wars, international mediation, the UN, Central Asian politics, and International Relations.

This book examines the effect of biased and neutral mediators in civil wars. Based on analysis of both global data and case studies of contemporary peace processes, including India and Norway in Sri Lanka, China in Cambodia, US in Israel/Palestine, and Russia in Georgia, the book makes two main contributions. First, it explores the role of biased mediators in contemporary peace processes. The author develops a theory explaining why biased mediators are more effective than their neutral counterparts and the book identifies four different mechanisms through which biased mediators can be effective peace-brokers. By developing a comprehensive set of mechanisms to explain bias mediation, the work deepens understanding of biased mediators in general, and their role in resolving civil conflict in particular. The second contribution offered is a novel way of measuring mediation success. Previous research has concentrated on settlement, behavior, or implementation. While these conceptualisations of mediation success all have merit, they fail to address how the basic incompatible positions are regulated. This book focuses on mediators' ability to regulate core compatibilities by crafting institutional peace arrangements that generally are considered to enhance the prospect for durable peace. This approach has wider implications for peace and conflict research by bringing together research on durability of peace and studies on international mediation, two fields of research which hitherto have been kept apart. This book will be of much interest to students of international mediation, conflict management, civil wars, security studies and IR in general.

This book evaluates the role of international mediators in bringing civil wars to an end and makes the case for 'powerful peacemaking' – using incentives and sanctions – to leverage parties into peace. As internal violence within countries is a hugely significant threat to international peace in the post-Cold War era, the question of how these wars end has become an urgent research and policy question. This volume explores a critical aspect of peacemaking that has yet to be sufficiently evaluated: the turbulent period beyond the onset of formal or open negotiations to end civil wars and the clinching of an initially sustainable negotiated settlement. The book argues that the transnational flow of weapons, resources, and ideas means that when civil wars today end, they are more likely to do so at the negotiating table than on the battlefield. It uses bargaining theory to develop an analytical framework to evaluate peace processes – moving from stalemate in wars to negotiated settlement – and it rigorously analyses the experiences of five cases of negotiated transitions from war and the role of international mediators: South Africa, Liberia, Burundi, Kashmir, and Sri Lanka.

Essay from the year 2003 in the subject Politics - International Politics - Topic: Peace and Conflict Studies, Security, grade: 2 (B), University of Kent (Brussels School of International Studies), course: Negotiation and Mediation, 16 entries in the bibliography, language: English, comment: Third Party intervention in dispute settlement negotiations has become ever more popular in recent years. Although international Mediators often succeed in brokering an agreement, the implementation of the negotiated treaties is rarely a concern of the international community. This essay argues that without credible third party guarantees for the implementation phase of peace treaties it is unlikely that the negotiated peace will last for long., abstract: Since the end of the Cold War the nature and perception of international conflict has changed significantly. Instead of inter-state war, intra-state conflicts now constitute the majority of current conflicts. "Global nuclear warfare is no longer the primary international security concern. It has been displaced by [...] excessively violent and destructive intra-state or internal conflicts." And these conflicts, which would have been regarded as purely internal matters during the Cold War, are now seen as being of international concern. Civil wars which are normally regionalised, are often nevertheless deemed to be a threat to international peace and security. As a result, the international community has become more and more involved in the resolution of civil wars, often by mediating peace negotiations between the parties involved. However, the resolution of civil war is one the most challenging tasks in Conflict Resolution. Only a minority of negotiations result in a lasting peace and only under exceptional circumstances is this achieved without a third party mediating the negotiations. Although many of the attempts to settle civil wars by mediation have failed, it is clear that the involvement of international mediator

This book examines Arab approaches to mediation, negotiation and settlement of political disputes. This book proposes that two clusters of independent variables are potentially responsible for the distinctive nature of Arab conflict resolution. Firstly, those linked with Arab political regimes and imperatives, and secondly those linked with Arab and /or Islamic culture. The text also focuses on the Arab League and its history of involvement in crisis and conflict situations, along with the roles of individual leaders, emissaries and extra-regional actors such as IGOs (Inter-Governmental Organisations) in undertaking mediation initiatives. IGO and Arab League activity has taken on new importance since the various intervention attempts in connection with the 'Arab Spring' since 2011. During the negotiation process, most Arab regimes tend to view conflicts within a broad historical context and Islamic culture prioritises the cohesion of the community and internal stability of the state over individual autonomy. This has created an authoritarian style of leadership, and in practice, leaders in the Middle East have had near absolute authority in the decision-making process—a fact which will have a lot of weight in conflict management and whether peace will endure for a long period of time. This book is unique in studying these clusters through comparative systematic case study analysis of events prior to and subsequent to the 'Arab Spring', augmented by a quantitative analysis of sample data on Arab disputes, compiled from a larger and newly augmented study comprising the years 1945-2000. Complementary data from the Uppsala Conflict Data Program's (UCDP) data base of armed conflicts since 1975 is also utilized. This book will be of much interest to students of conflict resolution, peace and conflict studies, Middle Eastern politics and IR in general.

Ending Holy Wars explores how religious dimensions affect the possibilities for conflict resolution in civil war. This is the first book that systematically tries to map out the religious dimensions of internal armed conflicts and explain the conditions under which religious dimensions impede peaceful settlement. It draws upon empirical work on global data, based on the Uppsala Conflict Data Program (UCDP), and complements this quantitative data with several smaller case studies (Sri Lanka, Philippines and Indonesia). The book shows how religious identities and incompatibilities influence the likelihood of agreements and the mechanisms through which parties and third-party mediators have been able to overcome religious obstacles to negotiated settlements. These findings pave the way for a discussion on how conflict theory can better incorporate religious dimensions, as well as how policy can be designed to manage religious dimensions in armed conflicts.

The end of the Cold War has changed the shape of organized violence in the world and the ways in which governments and others try to set its limits. Even the concept of international conflict is broadening to include ethnic conflicts and other kinds of violence within national borders that may affect international peace and security. What is not yet clear is whether or how these changes alter the way actors on the world scene should deal with conflict: Do the old methods still work? Are there new tools that could work better? How do old and new methods relate to each other? International Conflict Resolution After the Cold War critically examines evidence on the effectiveness of a dozen approaches to managing or resolving conflict in the world to develop insights for conflict resolution practitioners. It considers recent applications of familiar conflict management strategies, such as the use of threats of force, economic sanctions, and negotiation. It presents the first systematic assessments of the usefulness of some less familiar approaches to conflict resolution, including truth commissions, "engineered" electoral systems, autonomy arrangements, and regional organizations. It also opens up analysis of emerging issues, such as the dilemmas facing humanitarian organizations in complex emergencies. This book offers numerous practical insights and raises key questions for research on conflict resolution in a transforming world system.

Conflicts in the international system, both among and within states, bring death, destruction, and human misery. Understanding how third parties use mediation to encourage settlements and establish a durable peace among belligerents is vital for managing these conflicts. Among many features, this book empirically examines the history of post-World War II mediation efforts to: Chart the historical changes in the types of conflicts that mediation addresses and the links between different mediation efforts across time. Explore the roles played by providers of mediation in the international system - namely, individuals, states, and organizations - in managing violent conflicts. Gauge the influence of self-interest and altruism as motivating forces that determine which conflicts are mediated and which are ignored. Evaluate what we know about the willingness of parties in conflict to accept mediation, when and why it is most effective, and discuss the future challenges facing mediators in the contemporary world. Drawing on a wide range of examples from the Oslo Accords and Good Friday Agreement to efforts to manage the civil wars in Burundi, Tajikistan, and Bosnia, this book is an indispensable guide to international mediation for students, practitioners, and general readers seeking to understand better how third parties can use mediation to deal with the globe's trouble spots.
