Data warehouse refers to the process of
compiling and organizing data into one
common database, whereas data mining

Bookmark File PDF Data Warehousing And Mining

refers to the process of extracting useful data from the databases. The data mining process depends on the data compiled in the data warehousing phase to recognize meaningful patterns. A data warehousing is created to support management systems.

Data Mining vs Data Warehousing -

Bookmark File PDF Data Warehousing And Mining Javatpoint Previous Question Papers

Data warehousing is the process of pooling all relevant data together, whereas Data mining is the process of analyzing unknown patterns of data. Data warehouses usually store many months or years of data. This is to support historical analysis. Data mining is the use of pattern recognition logic to
