Figure 1: The development of Point and Figure Charting As you can see, Point and Figure charts assign a value to each square on the chart, which P&F chartists call 'boxes'. In the example above, each square or box is worth 1 point. As the price rises or falls by 1 point or more, new squares are filled.

Jeremy du Plessis - one of the foremost Point and Figure experts in the world - returns with a fully updated second edition of this definitive guide in an effort to redress this imbalance. This second edition, with an extensive revision to the text and introduction of brand new techniques, demystifies the world of Point and Figure charting.

The Definitive Guide to Point and Figure by Jeremy du ...

Point and figure (P&F) is a charting technique used in technical analysis. Point and figure charting does not plot price against time as time-based charts do. Instead it plots price against changes in direction by plotting a column of Xs as the price rises and a column of Os as the price falls.
