This book provides an overview of modern boot firmware, including the Unified Extensible Firmware Interface (UEFI) and its associated EFI Developer Kit II (EDKII) firmware. The authors have each made significant contributions to developments in these areas. The reader will learn to use the latest developments in UEFI on modern hardware, including open source firmware and open hardware designs. The book begins with an exploration of interfaces exposed to higher-level software and operating systems, and commences to the left of the boot timeline, describing the flow of typical systems, beginning with the machine restart event. Software engineers working with UEFI will benefit greatly from this book, while specific sections of the book address topics relevant for a general audience: system architects, pre-operating-system application developers, operating system vendors (loader, kernel), independent hardware vendors (such as for plug-in adapters), and developers of end-user applications. As a secondary audience, project technical leaders or managers may be interested in this book to get a feel for what their engineers are doing. The reader will find: An overview of UEFI and underlying Platform Initialization

Misty memories of a boy born to a poor sharecropper in the worst economic depression the world has ever known come to life with dramatic clarity in this troublinhg memoir. Trapped into surviving on the pittance realized by his family for growing the deadly health killing tobacco plant, Jeff struggles to understand the societal contradictions that control his existence throughout the twentieth century. Imagination and dreamy fantasies fertilize larger hopes for him as he plows his father's lonely fields and wrestles with the arbitrary behavioral imperatives that control his life. Cruelly deprived of broad cultural stimulation, Jeff struggles to realize dreams fostered by Hollywood myths and pulp fiction. Plentiful food--a gift of the land--adequate housing and most of all, a pervassive love and caring concern by others sharing this coimmunity of poverty and hard work, not only are sustaining but give him sweet lasting memories of those hard times. Anger at deprivations endured by his parents fuel ambitions to escape a life growing the noxious crops of tobacco. Nourished by the love, warmth and generosity of a large extended family living a similar life, Jeff survives to engage the larger world

Designed as a textbook for undergraduate students in various engineering disciplines—Mechanical, Civil, Industrial Engineering, Electronics Engineer-ing and Computer Science—and for postgraduate students in Industrial Engineering and Water Resource Management, this comprehensive and well-organized book, now in its Second Edition, shows how complex economic decisions can be made from a number of given alternatives. It provides the managers not only a sound basis but also a clear-cut approach to making decisions. These decisions will ultimately result in minimizing costs and/or maximizing benefits. What is more, the book adequately illustrates the concepts with numerical problems and Indian cases. While retaining all the chapters of the previous edition, the book adds a number of topics to make it more comprehensive and more student friendly. What's New to This Edition

- Discusses different types of costs such as average cost, recurring cost, and life cycle cost.
- Deals with different types of cost estimating models, index numbers and capital allowance.
- Covers the basics of nondeterministic decision making.
- Describes the meaning of cash flows with probability distributions and decision making, and selection of alternatives using simulation.
- Discusses the basic concepts of Accounting.

Is this the way love is supposed to feel? • Does the man you love assume the right to control how you live and behave? • Have you given up important activities or people to keep him happy? • Is he extremely jealous and possessive? • Does he switch from charm to anger without warning? • Does he belittle your opinions, your feelings, or your accomplishments? • Does he withdraw love, money, approval, or sex to punish you? • Does he blame you for everything that goes wrong in the relationship? • Do you find yourself “walking on eggs” and apologizing all the time? If the questions here reveal a familiar pattern, you may be in love with a misogynist – a man who loves you, yet causes you tremendous pain because he acts as if he hates you. In this superb self-help guide, Dr. Susan Forward draws on case histories and the voices of men and women trapped in these negative relationships to
