When landscaping your home, it's crucial to get your design down on paper. Landscape plans do just that by turning ideas into visuals. Landscape designers and architects are skilled at analyzing your needs and ideas and then using them to create detailed plans and drawings. Having landscape plans drawn up before starting your landscaping project will help you visualize what the end result will be like.

Both types are used to measure and draw scaled documents accurately. Landscape Architects mostly use what is referred to as an 'Engineer's Scale'. For example, if we know that a drawing or image is printed to an accurate scale of 1" = 40', we can utilize the '40 scale' side of the scale to take quick measurements.

~~The Daily Tools of a Landscape Architect — DG2 Design~~

Every landscape architect has her or his own drawing style, and the site plan can be illustrative with full color, or it might lean toward being more technical in black and white. The drawing is created at a standard scale. The scale of the drawing depends on how large the property is and how much detail needs to be shown.
