Classification of Drugs on the basis of Molecular Targets: Drugs target the macromolecules inside the body to generate a biological response. Such macromolecules are called target molecules or drug targets. Drugs that have the same mechanism of action will have the same target. This basis for the classification of drugs is more helpful during clinical trials.

Classification of Drugs - Drug Types and Drugs Chemical ...  
If you can memorize the most common use for the top medication classes, you will be in good shape here. By equating a given drug with a drug class, and knowing what drugs in that class are typically used for, you ' ve cut your study time down quite a bit! Some drugs can have many uses, but you should only be concerned with the primary or most common use of a medication. The study guide we provide at the end of this article is especially useful for this.
