Voice Communications

Systems

Emergency voice communication (EVC) systems allow firefighters and others, including members of the public, to communicate with one another during emergency situations in and around buildings, at sports and similar venues. Eaton's has a

Acces PDF Emergency

range of analogue and digital systems designed for all builds, whether small and basic or larger and more complex.

Emergency voice communication (or EVC) systems provide two-way

communication during the evacuation of a building during a fire or other emergency. We manufacture two types of system: the radial-wired Care2 and the loop-wired Omnicare. Omnicare and Care2 are fully BS5839-9 and

Acces PDF Emergency

BS8300 compliant and include options for fire telephone, disabled refuge, steward telephone and disabled toilet alarm outstations. Do you have a FireCare, AssureCare, CommuniCare or CommuniCare Advance system?

Emergency Voice Communication

Systems A disabled
refuge is a relatively
safe area within a
building or exit staircase
where mobility impaired
occupants can stay
while the main building
occupancy is evacuated,
allowing building
management and
emergency services to

Acces PDF Emergency

safely assist these
people from the building
when stairwell crowding
has eased.
