After decades of domination on campus, college sports' supremacy has begun to weaken. "Enough, already!" detractors cry. College is about learning, not chasing a ball around to the whir of TV cameras. In Intercollegiate Athletics and the American University James Duderstadt agrees, taking the view that the increased commercialization of intercollegiate athletics endangers our universities and their primary goal, academics. Calling it a "corrosive example of entertainment culture" during an interview with ESPN's Bob Ley, Duderstadt suggested that college basketball, for example, "imposes on the university an alien set of values, a culture that really is not conducive to the educational mission of university." Duderstadt is part of a growing controversy. Recently, as reported in The New York Times, an alliance between university professors and college boards of trustees formed in reaction to the growth of college sports; it's the first organization with enough clout to challenge the culture of big-time university athletics. This book is certainly part of that challenge, and is sure to influence this debate today and in the years to come. James J. Duderstadt is President Emeritus and University Professor of Science and Engineering, University of Michigan.

Tim Richmond was, fellow NASCAR driver Kyle Petty said, "a stranger in time." In one regard, the flashy, flamboyant driver from Ashland, Ohio, was years ahead of the trends in a sport that would soon enjoy explosive growth in popularity. Women who were NASCAR fans loved him—and so did their husbands and boyfriends. Richmond believed he could use his stardom in racing as a springboard to a second career as an actor, and he had the Hollywood good looks to make that a realistic dream. At the same time, Richmond was also a throwback. He pushed his race cars hard, too hard at times, driving every lap like he was hauling moonshine through the mountains of the Carolinas with a revenue on his rear bumper. Those who saw him drive still compare him to veterans like Curtis Turner and Joe Weatherly, who ran as hard off the track as they did off of it. In the early 1980s, however, Richmond stood out. He was not from the South; he had not grown up slinging a stock car through the dirt on red-clay ovals. He had, in fact, never raced at all until he was twenty-one. And just ten years later, after making a splash in the Indianapolis 500 as a rookie, he was emerging as one of the brightest stars and greatest talents in NASCAR's Winston Cup Series. Richmond's star was bright, but its light went out too soon. As he neared stock car racing's zenith, Richmond's life took a tragic turn. A man who thrived on the affection he felt from those who enjoyed watching him compete spent his final months almost completely shut off from that world. *Tim Richmond: The Fast Life and Remarkable Times of NASCAR's Top Gun* tells the memorable story of a born racer and how he raced headlong through life with the throttle wide open and his wheels burning rubber at almost every turn.

This unique international legal and cross-disciplinary edited volume contains analysis of the legal impact of doping regulation by eminent and well known experts in the legal fields of sports doping regulation and diverse legal fields which are intrinsically important areas for consideration in the sports doping landscape. These are thoughtful extended reflections by experts on theory and policy and how they interact with law in the context of doping in sport. It is the first book to examine the topical and contentious area of sports doping from a variety of different but very relevant legal perspectives which impact the stakeholders in sport at both professional and grass roots levels. The World Anti-Doping Code contains an unusual mix of public and private regulation which is of more general interest and fully explored in this work. Each of the 14 chapters addresses doping regulation from a legal perspective such as tort, corporate governance, employment law, human rights law, or a scientific area. Legal areas are generally considered from an international and not national perspective. Issues including fairness, logic and the likelihood of compliance are explored. It is vital reading for anyone interested in the law, regulation and governance of sport.

"Time is something that cannot be bought, it cannot be wagered with God and it is not in endless supply. Time is simply how you live your life." —Craig Sager Thanks to an eccentric wardrobe filled with brightly-colored suits and a love of sports that knows no bounds, Craig Sager is one of the most beloved and recognizable broadcasters on television. So when the sports world learned that he was diagnosed with acute myeloid leukemia (AML) there was an outpouring of love and support from everyone who was inspired by his colorful life and his fearless decision to continue doing the job he loved—despite being told that he would have only three-to-six months to live. Sager has undergone three stem cell transplants—with his son as the donor for two of them—and more than twenty chemotherapy cycles. In *Living Out Loud*, Craig Sager shares incredible stories from his remarkable career and chronicles his heroic battle. Whether he's sprinting across Wrigley Field mid-game as a college student with cops in pursuit, chasing down Hank Aaron on the field for an interview after Aaron broke Babe Ruth's home run record, running with the bulls in Pamplona, or hunkering down to face the daunting physical challenges of fighting leukemia, Craig Sager is always ready to defy expectations, embrace life, and live it to the fullest. Including a foreword by Charles Barkley and with unique insight from his son Craig Sager II, this entertaining, honest, and introspective account of a life lived in sports reveals the enduring lessons Sager has learned throughout his career and reminds you that no matter what life throws at you, to always look at the bright side.
