A journalist, diplomat, and writer, William Christian Bullitt (1891–1967) negotiated with Lenin and Stalin, Churchill and de Gaulle, Chiang Kai-shek and Goering. He took part in the talks that ended World War I and those that failed to prevent World War II. While his former disciples led American diplomacy into the Cold War, Bullitt became an early enthusiast of the European Union. From his early (1919) proposal of disassembling the former Russian Empire into dozens of independent states, to his much later (1944) advice to land the American troops in the Balkans rather than in Normandy, Bullitt developed a dissenting vision of the major events of his era. A connoisseur of American politics, Russian history, Viennese psychoanalysis, and French wine, Bullitt was also the author of two novels and a number of plays. A friend of Sigmund Freud, Bullitt coauthored with him a sensational biography of President Wilson. A friend of Bullitt, Mikhail Bulgakov depicted him as the devil figure in <i>The Master and Margarita</i> . Taking seriously Bullitt ' s projects and foresights, this book portrays him as an original thinker and elucidates his role as a political actor. His roads were not taken, but the world would have been different if Bullitt ' s warnings had been heeded. His experience suggests powerful though lost alternatives to the catastrophic history of the twentieth century. Based on Bullitt ' s unpublished papers and diplomatic documents from the Russian archives, this new biography presents Bullitt as a truly cosmopolitan American, one of the first politicians of the global era. It is human ideas and choices, Bullitt ' s projects and failures among them, that have brought the world to its current state.

This ground-breaking study represents a new twist in the already complicated debate on military change in the early modern period. Previous writers have for the most part defined a 'military revolution' focused on the seventeenth or even early eighteenth centuries. Etlis suggests that key developments in training, organization, tactics and siege warfare occurred in the sixteenth century and, taken together, these innovations constitute a military revolution, changing the face of war. In England, these changes came later than in the rest of Europe, and in Ireland later still. English writers, in their anxiety to spur their countrymen to adopt the new methods, produced some of the most useful manuals of sixteenth-century Europe. These, together with Italian, Spanish, French and German texts, form the main basis of David Etlis's study, allowing the ideas of contemporaries to be set alongside accounts of actual military conditions in explaining one of the turning points of world military development.
