Food Ingredients to Avoid: Anything Genetically Modified (GMO) The subject of GMOs (which stands for genetically modified organisms) is controversial, only because those trying to push them on everyone are dishonest. Most major food companies and grocery stores and restaurants want to use GMOs, and they don't want you to know you're eating them. The reason for this is because GMOs increase their profits, but have never been proven safe for humans - and there are multiple studies suggesting ...
