A new world has arrived... Underground Book Reviews 2015 Top Pick Award Synthetic stem cells mean no more organ failure, no more pharmaceuticals. No cancer. The human race is stronger and smarter. Is it better? Cali is a nanobiometric engineer who has been her younger brother's guardian since their parents died. She's lost too many people in her life to lose another. When the government declares the Halfskin Laws will shut down anyone with too many synthetics, she decides to hide him. Jamie wants to be a halfskin. Her days are dull and pointless. More synthetics would give her control of her life. She's already 49.9%. One more dose and she registers. Then she gets shutdown. But there is a way to hide. Paul is a brick. 100% synthetic. Only the Sentient Laws keep him alive. Life on the Settlement, however, is hardly living. He wants to escape, to return to a simpler life when he was organic. Imperfect. When he was clay. But that world is over. A new one is just beginning. Follow this twisting, slippery grip on reality as the human race battles for perfection only to discover a secret that is beyond anyone's imagination.

HALFSKIN (#1) Biomites are artificial stem cells that can replace any cell in your body. No more kidney failure, no severed spines or blood disease. No cancer. Pharmaceuticals become obsolete. With each dose of biomites, we become stronger, we become smarter and prettier. We become better. At what point are we no longer human?

CLAY (#2) Jamie wants to be a halfskin. Her life has become dull and pointless. If she had more biomites-synthetic stem cells that promise hope-she could take control of her life. But Jamie's body is already 49.9% biomites. The rest is clay-her God-given organic cells. Any more biomites and she becomes a halfskin. And halfskins are shutdown. But there is a way. BRICKS (#3) Fabbers, slabbers and fakies were dehumanizing slurs for fabricated humans. Bricks, however, was the People's favorite. INTERVIEW WITH THE AUTHOR WHAT GENRE DO YOU PREFER? Science fiction, dystopia, technothriller and, to some extent, young adult. I do have a series of novellas in the vampire genre. Yeah, I know. Doesn't fit. That character, Drayton, came out of nowhere when I was at a community theatre production of Dracula. I figured that an immortal vampire would more likely become compassionate and wise as he grew older. The technothriller Halfskin is similar to vampires in that technology promises immortality and complete control of our bodies. But then what? WHY A SYNTHETIC STEM CELL? Organic life is too nilly-willy. We're limited by our DNA. Give it to the scientists to perfect this vehicle that carries us around because it is a vehicle. If we no longer have organic bodies, if every one of our cells is replaced by something manmade all the way down to the neurons and synapses, then what are we? What if our world is just a computerized environment, ala The Matrix? Would we know the difference? Look, we're printing organs today. I'm not, but someone is. Some genius has figured out how to push play and heart or liver or kidney comes down the chute. Halfskin takes the idea into the distant future and explores whether this leads to more happiness or just more of the same. Because more money, more problems. DO YOU HAVE ANOTHER JOB BESIDES AUTHOR? Day job, I'm a college horticulture teacher. Writing is a passion. No plans to change it. WHAT IS YOUR MOTTO? Breathe. WHAT TALENT WOULD YOU MOST LIKE TO HAVE? Omnipresent supergalactic oneness. IF WE HAD A CUSTOM THAT ALLOWED US TO EAT OUR CHILDREN, WHAT KIND OF

SAUCE WOULD YOU USE? Ketchup, the miracle condiment. ARE OUR ELECTRONIC DEVICES STEALING OUR SOUL? AND IF SO, DO YOU MAKE OFFERINGS TO YOUR TOASTER? I offer white bread and the toaster gives back crunchy, brown bread. Never doubt a true miracle.

We map the universe with five senses Interpret reality with our mind We rely on this body What a poor vessel it is Jamie wants to be a halfskin. Her life has become dull and pointless. If she had more biomites—synthetic stem cells that promise hope—she could take control of her life. But Jamie's body is already 49.9% biomites. The rest is clay—her God-given organic cells. Any more biomites and she becomes a halfskin. And halfskins are shutdown. But there is a way. Black market biomites, called nixes, can't be detected by the government's halfskin hunter, M0ther. Jamie would have to sacrifice her clay to get the nixes, but they would make her halfskin without anyone knowing. Including M0ther. But first she has to find them. Nix Richards can help. He's the first halfskin to escape M0ther and Jamie has something he wants. He'll need her to help him find a fabricator. He'll betray anyone to get it, even those

closest to him. This psychological thriller will keep Nix and Jamie second-guessing every move while they elude M0ther and Marcus Anderson, the man that wants to rid the world of biomites. But in the end, they'll all discover just how deep the betrayal goes.

Welcome back to the brash, brutal new world of the twenty-fifth century: where global politics isn't just for planet Earth anymore; and where death is just a break in the action, thanks to the technomiracle that can preserve human consciousness and download it into one new body after another. Cynical, quick-on-the-trigger Takeshi Kovacs, the ex-U.N. envoy turned private eye, has changed careers, and bodies, once more . . . trading sleuthing for soldiering as a warrior-for-hire, and helping a far-flung planet's government put down a bloody revolution. But when it comes to taking sides, the only one Kovacs is ever really on is his own. So when a rogue pilot and a sleazy corporate fat cat offer him a lucrative role in a treacherous treasure hunt, he's only too happy to go AWOL with a band of resurrected soldiers of fortune. All that stands between them and the ancient alien spacecraft they mean to salvage are a massacred city bathed in deadly radiation, unleashed nanotechnology with a million ways to kill, and whatever surprises the highly advanced Martian race may have in store. But armed with his genetically engineered instincts, and his trusty twin Kalashnikovs, Takeshi is ready to take on anything—and let the devil take

You're riding in your self-driving car when suddenly the doors lock, the route changes and you have lost all control. Then, a mysterious voice tells you, "You are going to die." Just as self-driving cars become the trusted, safer norm, eight people find themselves in this terrifying situation, including a faded TV star, a pregnant young woman, an abused wife fleeing her husband, an undocumented immigrant, a husband and wife, and a suicidal man. From cameras hidden in their cars, their panic is broadcast to millions of people around the world. But the public will show their true colors when they are asked, "Which of these people should we save?...And who should we kill first?"
