The Fourth Edition of *Hate Crimes: Causes, Controls, and Controversies* by Phyllis B. Gerstenfeld takes a multidisciplinary approach that allows students to explore a broad scope of hate crimes. Drawing on recent developments, topics, and current research, this book examines the issues that foster hate crimes while demonstrating how these criminal acts impact individuals, as well as communities. Students are introduced to the issue through first-person vignettes—offering a more personalized account of both victims and perpetrators of hate crimes. Packed with the latest court cases, research, and statistics from a variety of scholarly sources, the Fourth Edition is one of the most comprehensive and accessible textbooks in the field.

Hate Crimes in America covers the history of crimes motivated by prejudice, examples of such incidents in the headlines today, and the ways in which communities are responding to these vicious acts. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO.

Few would argue that a violent attack motivated by negative feelings towards the victim's race, ethnicity, religion, or sexual orientation is a hate crime. But should a hate-motivated crime be punished differently than the same crime committed for a different motive? What if the crime is verbal, a slur or a ranting blog post or a graffiti scrawl? These may be hateful, but are they hate crimes? And how should they be punished? Are hate crimes on the rise, or are media attention and greater sensitivity to the issue making it appear so?

These and other questions are at the center of this thought-provoking collection of articles drawn from across the political spectrum and the globe.

In the early 1980s, a new category of crime appeared in the criminal law lexicon. In response to concerted advocacy-group lobbying, Congress and many state legislatures passed a wave of "hate crime" laws requiring the collection of statistics on, and enhancing the punishment for, crimes motivated by certain prejudices. This book places the evolution of the hate crime concept in socio-legal perspective. James B. Jacobs and Kimberly Potter adopt a skeptical if not critical stance, maintaining that legal definitions of hate crime are riddled with ambiguity and subjectivity. No matter how hate crime is defined, and despite an apparent media consensus to the contrary, the authors find no evidence to support the claim that the United States is experiencing a hate crime epidemic--instead, they cast doubt on whether the number of hate crimes is even increasing. The authors further assert that, while the federal effort to establish a reliable hate crime accounting system has failed, data collected for this purpose have led to widespread misinterpretation of the state of intergroup relations in this country. The book contends that hate crime as a socio-legal category represents the elaboration of an identity politics now manifesting itself in many areas of the law. But the attempt to apply the anti-discrimination paradigm to criminal law generates problems and anomalies. For one thing, members of minority groups are frequently hate crime perpetrators. Moreover, the underlying conduct prohibited by hate crime law is already subject to criminal punishment. Jacobs and Potter question whether hate crimes are worse or more serious than similar crimes attributable to other anti-social motivations. They also argue that the effort to single out hate crime for greater punishment is, in effect, an effort to punish some offenders more seriously simply because of their beliefs, opinions, or values, thus implicating the First Amendment. Advancing a provocative argument in clear and persuasive terms, Jacobs and Potter show how the recriminalization of hate crime has little (if any) value with respect to law enforcement or criminal justice. Indeed, enforcement of such laws may exacerbate intergroup tensions rather than eradicate prejudice.

In The Name of Hate is the first book to offer a comprehensive theory of hate crimes, arguing for an expansion of the legal definitions that most states in the U.S. hold. Barbara Perry provides an historical understanding of hate crimes and provocatively argues that hate crimes are not an aberration of current society, but rather a by-product of a society still grappling with inequality, difference, fear, and hate.

Hate crimes can take many forms. Assaulting someone, vandalizing their property, or simply making them feel threatened are all considered hate crimes when they are motivated by animosity for a particular group. Readers learn that these offenses often take place because the perpetrator has a fundamental misunderstanding or fear of the people in that targeted group. Informative charts and discussion questions for each chapter encourage readers to think critically about the way people's biases can dictate their behavior in ways that harm others.

Hate crimes and lesser acts of bigotry and intolerance seem to be constants in today's world. Since 1990, the federal government has published annual reports on hate crime incidents in the United States. While the reported numbers are disturbing, even more devastating is the impact of these crimes on individuals, communities, and society. This comprehensive textbook can serve as a stand-alone source for instructors and students who study hate crimes and/or other related acts. It invites the reader to consider relevant social mores and practices as well as criminal justice policies as they relate to hate crimes by presenting this subject within a broad context.

Violence motivated by racism, anti-Semitism, misogyny, and homophobia weaves a tragic pattern throughout American history. Fueled by recent high-profile cases, hate crimes have achieved an unprecedented visibility. Only in the past twenty years, however, has this kind of violence—itsself as old as humankind—been specifically categorized and labeled as hate crime. *Making Hate a Crime* is the first book to trace the emergence and development of hate crime as a concept, illustrating how it has become institutionalized as a social fact and analyzing its policy implications. In *Making Hate a Crime* Valerie Jenness and Ryken Grattet show how the concept of hate crime emerged and evolved over time, as it traversed the arenas of American politics, legislatures, courts, and law enforcement. In the process, violence against people of color, immigrants, Jews, gays and lesbians, women, and persons with disabilities has come to be understood as hate crime, while violence against other vulnerable victims—octogenarians, union members, the elderly, and police officers, for example—has not. The authors reveal the crucial role social movements played in the early formulation of hate crime policy, as well as the way state and federal politicians defined the content of hate crime statutes, how judges determined the constitutional validity of those statutes, and how law enforcement has begun to distinguish between hate crime and other crime. Hate crime took on different meanings as it moved from social movement concept to law enforcement practice. As a result, it not only acquired a deeper jurisprudential foundation but its scope of application has been restricted in some ways and broadened in others. *Making Hate a Crime* reveals how our current understanding of hate crime is a mix of political and legal interpretations at work in the American policymaking process. Jenness and Grattet provide an insightful examination of the birth of a new category in criminal justice: hate crime. Their findings have implications for emerging social problems such as school violence, television-induced violence, elder-abuse, as well as older ones like drunk driving, stalking, and sexual harassment. *Making Hate a Crime* presents a fresh perspective on how social problems and the policies devised in response develop over time. A Volume in the American Sociological Association's Rose Series in Sociology
