File Type Handlers. 05/31/2018; 2  
minutes to read; In this article.  
Registering a file type is the first step  
in creating a file association, which  
makes that file type "known" to the  
Shell. However, without file type  
handlers, the Shell is unable to expose  
information to the user from and about  
the file.

While these file types are associated with individual applications, other file types, such as rich text RTF files and MP3 audio files are standard file types that can be opened by multiple programs. The terms "file type" and "file format" are often used interchangeably. However, a file format technically describes the structure and content of a file. For example, the file type of an image file
