~~Cpr Guidelines~~

Open the child's airway by placing 1 hand on their forehead and gently tilting their head back and lifting the chin. Remove any visible obstructions from the mouth and nose. Pinch their nose. Seal your mouth over their mouth, and blow steadily and firmly into their mouth, checking that their chest rises. Give 5 initial rescue breaths.

~~First aid CPR NHS~~

For infants, use your mouth to make a complete seal over the infant's mouth and nose, then blow in for one second to make the chest clearly rise. Now, deliver

~~Cardiopulmonary Resuscitation (CPR) In Children~~
Resuscitation Council UK Guidelines 2015 state "If you are untrained or unable to do rescue breaths, give chest compression-only CPR (i.e. continuous compressions at a rate of at least 100-120 min⁻¹)". Because of the heightened awareness of the possibility that the victim may have COVID-19, Resuscitation Council UK offers this advice:

~~2015 Resuscitation Guidelines | Resuscitation Council UK~~

Cardiopulmonary resuscitation (CPR) teaching for parents before an infant's hospital discharge is the usual practice in many neonatal intensive care units. A thorough literature review was conducted to ascertain whether teaching infant resuscitation to parents of neonates about to be discharged decreases mortality and morbidity rates.

~~Teaching parents infant resuscitation~~
