By Lisa Zimmer Hatch, Scott A. Hatch. These days, all kinds of information is condensed into graphs and charts, so it's good to know how to read visually. The ACT Math exam will contain at least a few questions where you'll need to interpret what a graph is saying in order to solve the problem. The following practice questions are similar to what you'll find: in one, you have to figure out a salesman's traveling schedule based on a graph of his distance travelled each day, and in the ...

Part of the GED Mathematical Reasoning test focuses on your ability to understand data presented in graph form, whether a graph, plot, histogram, or table. You may also be asked to plot data points on a coordinate plane. Graphs are used more for revealing the significance of data and spotting trends and less for presenting precise values. During the actual test, you may be instructed to click an area of the graph to plot a point; you just need to get pretty close to the precise spot.
