Seminar paper from the year 2015 in the subject Business economics - Business Management, Corporate Governance, grade: 1.2, language: English, abstract: The senior adviser and eight president from Toyota, Hiroshi Okuda, said in year 1997: "We wish to make Toyota not only strong, but a universally admired company, winning the trust and respect of the world. We must be a company that is accepted wholeheartedly by people around the world, who would think it natural if Toyota became No 1 in size, since we provide attractive products that excel in environmental protection and in safety. " Do this quotation become reality? In this coursework, the Toyota Motor Corporation will be present with its presentation of company, mission, vision and also the range of products. After this, the mnemonic of PESTEL will be explained in chapter three. In addition the limitation of the PESTEL-Analysis will be shown. In Chapter four, the particular factors of the PESTEL-Analysis will be introduced by relating to Toyota Motor Corporation, but only in Germany, because otherwise it would be too extensive. The next chapter will deal with an overall evaluation/assessment followed by recommendations for further strategic orientation which will complete this coursework.

Scholarly Research Paper from the year 2010 in the subject Business economics - Business Management, Corporate Governance, grade: 1.0, Northumbria University, course: Strategic Management and Leadership, language: English, comment: Beste Arbeit in Strategic Management des Jahrgangs / Best Strategic Management Assignment of the Year, abstract: Japan Airlines Corporation (JAL) is the leading full-service airline in Asia operating in the domestic and international passenger air-transport industry. However, in 2009 JAL's financial situation is alarming. 2009 was completed by a ¥51bn operating loss, representing a decrease of ¥140bn from previous year. In comparison, JAL's major competitor All Nippon Airways manages to stay in the black. This means JAL's competitive position is clearly in danger. Even worse - if JAL does not find a new strategic option immediately they are in danger of going bankrupt soon. This paper intends to find such a strategic option to guarantee future success of the airline. A thorough strategic analysis including an internal and external analysis is used to find out the key strategic issues. Afterwards three possible strategic options are discussed. The most promising option is put forward and its implementation issues are thoroughly discussed.

Seminar paper from the year 2010 in the subject Business economics - Operations Research, grade: 1.0, Northumbria University, language: English, abstract: On 19th January 2010, Japan Airlines (JAL), Asia's biggest carrier, filed for bankruptcy. This assignment conducts both an external and internal analysis of JAL and gives a SWOT summary. From that, three strategic options are derived and discussed, leaving the most suitable, feasible and acceptable strategy. Finally, this strategy's potential implementation issues are debated.

The perspectives of technologists, economists, and policymakers are brought together in this volume. It includes chapters dealing with approaches to assessment of technology leadership in the United States and Japan, an evaluation of future impacts of eroding U.S. technological preeminence, an analysis of the changing nature of technology-based global competition, and a discussion of policy options for the United States.

The influence of organised crime on business activities, enterprises and economic sectors is a matter of concern for many policy makers across the world. As a profit driven criminal activity, organised crime operates in an environment which is not limited to the underworld economy alone. Assessments of the threat posed by organised crime and strategic (preventive) actions to tackle this phenomenon require an understanding of the vulnerable spots in the legal economy that are or might be exploited by crime. This book is the outcome of a study known under the acronym MAVUS II (Method for and Assessment of Vulnerability of Sectors II) which addresses this issue. The study, financed under the 2005 AGIS programme of the European Commission, provides a vulnerability profile of the European pharmaceutical sector based on a new methodology to scan economic sectors for their vulnerability to (organised) crime. Both vulnerability study and methodological tool are intended as a guide for actions and initiatives to be taken by governments, law enforcement bodies and economic players.

This text provides students with an introduction to international human resource management. The authors assume no background knowledge of HRM and blend academic theories with numerous practical examples. Case studies from a wide range of geographical regions and cultures are employed, East as well as West.

Seminar paper from the year 2010 in the subject Business economics - Business Management, Corporate Governance, grade: 1.0, University of Sunderland, course: Contemporary Developments in Business and Management, language: English, abstract: 2 Introduction to Report on the Toyota Company 2.1 Introductory Information Report on the Engel and Voelkers Company Prepared for: CEO of the Toyota Company Prepared by: Arkadi Borowski, registered student at the University of Sunderland, United Kingdom Subject: Contemporary Developments in Business and Management of the Toyota Company Distributed: April 9th, 2010 2.2 Introduction The CEO of the Toyota Company Mr. Akio Toyoda has asked me, Arkadi Borowski, to prepare a business report that addresses the internal and external influences as well as the global political changes to which the Toyota Company is subject to. To be able to present a high-quality business report, I did detailed research on the company and its business environment. The information was gathered from: the company's Annual Report 2008/2009, the official website of Toyota and internal know-how of the company. The sources and the additional professional literature are quoted in the references at the end of the document. 2.3 Executive Summary The present report deals with the analyses of the internal and external business environment, for this purpose the "PESTLE" analysis and the "Porter's five forces model" were used. It also gives a short overview of the company and the type of business it is involved in. The second part of the report is an in depth analysis of how global political changes affect Toyota's policies and decision-making. There is also an evaluation of the effectiveness of the company's response and the demonstration of areas for improvement.

At the time of its publication, 1932, this was the longest mystery ever written. Would you believe, 313.000 words -- many of them in a strange Hispano-German dialect. It's a simple story about world war in 1942 between an alliance between Germany, Japan, and Mexico against the US and the rest of the world. 3D TV figures prominently, as well as a cactus that proves to be the world's most perfect food source. A remarkable novel, far ahead of its time!

Basic Strategy in Context centres on real-world firms and managers by giving each chapter's cases a higher weighting in importance and explanation than is normal. Given this emphasis on real-world as opposed to theoretical treatment the book enables the solving of practical business problems like those below. This emphasis on reality is cemented by the book's treatment of diversity as being the norm highlighted through European business cases from different countries. Giving example answers and links from case to theory rams home further the expected usefulness of the book to students about to enter industry. Often theory and cases are treated as different and separated topics, we believe that our integrated didactic treatment is quite unique. Finally we use the basic theories of strategy and then show how these mainly simple concepts can be extended to solve tricky business problems anywhere in any industry. Here is a sample of specific practical problems to which this book can show solutions. Why are resources important and how are they leveraged? Using the case of a British failure (Railtrack) we show the fatal consequences of neglecting existing resources, and then in a completely different country and industry (Carlo Gavazzi Space in Italy) how resources can be utilised from outside the firm to achieve leverage. Given our emphasis on diversity we highlight successful change in a foreign and inflexible environment (Japan and Carlos Ghosn). But can change be planned? Sometimes events or luck sabotage the best intentions as shown in the Samsung case. The book differentiates itself from the competition in four ways: Cases form the highlight of the book. Taking European and some international cases as the starting point, the objective is to link themes or topics to a description of their effect on the firm. The linkage will occur at the relevant point in the case, not in a separate section or in another book. The author team has used several longitudinal cases spread over a 15-20 year period. The longitudinal cases are supported by some new, non-longitudinal cases selected from award winning cases associated with the LRP Journal and the Gate2Growth Academic Network. We feel such an emphasis on cases is a novel feature. The theory is explained using a range of modern didactic methods not usually found in competitive offerings. Examples include colour coded and highlighted links from the theory to the case, questions inside each theory section with model answers and unanswered questions to test the student's grasp of the concepts. The book features a mixture of cases from short specific to academically challenging ones. Too often, superficial cases are placed at the end of chapters in strategy theory books. They are picked to emphasize the topics of the preceding chapters. The result is spoon-feeding, with little need or motivation to provoke individual thought or learning. The cases in this book are comprehensive, approximately 20 pages in length, with ample quantitative and qualitative data, thus forcing a modicum of effort from the student. Shorter cases are also included for ease of understanding and instructor flexibility. Another differentiating feature is the emphasis on diversity hence the use of European as opposed to US based cases. "Thomson and Baden-Fuller have crafted a highly original and practical strategy textbook covering a wide range of strategic issues, debates, and frameworks. Their work contains a thorough overview of the strategy field, appealing cases of European firms such as Abraqueabra and Your cup of tea, as well as insightful treatises on the Brent Spar ignominy and the weapon industry. The clever combination of mini-cases, theory, questions and full-fledged cases, and a clear overall structure ensure that students obtain a representative image of strategy as it plays out in the 21st century." —Paul W. L. Vlaar, Associate Professor, Vrije Universiteit Amsterdam, Faculty of Economics and Business Management
