New York is a city dense with people who are making, doing, and living. One of them was illustrator Jason Polan, who was prolific in his quality of observation and the quantity in which he did so ...

When he was twenty-three, Jason Capital woke up one morning with only twenty-three dollars to his name, feeling stuck and overwhelmed. He realized that he wasn't going to win the game of life based on what he learned at school and from his parents. But Capital turned it around in less than a year by applying High Status techniques. He's now the World's #1 Success Trainer, and with the guidance he provides in this invaluable volume, you too can harness this cutting-edge technology, take control of your own destiny, and become a person of power, influence, and remarkable achievement.

Is it really possible to be a Rainmaker AND have peace of mind? . . . We think so! Whether you are a well-established lawyer or just starting your practice, this book offers tips, strategies, and innovative insights that is sure to help you succeed.

An encyclopedia designed especially to meet the needs of elementary, junior high, and high school students.

With the winds of trade war blowing as they have not done in decades, and Left and Right flirting with protectionism, a leading economist forcefully shows how a free and open economy is still the best way to advance the interests of working Americans. Globalization has a bad name. Critics on the Left have long attacked it for exploiting the poor and undermining labor. Today, the Right challenges globalization for tilting the field against advanced economies. Kimberly Clousing faces down the critics from both sides, demonstrating in this vivid and compelling account that open economies are a force for good, not least in helping the most vulnerable. A leading authority on corporate taxation and an advocate of a more equal economy, Clousing agrees that Americans, especially those with middle and lower incomes, face stark economic challenges. But these problems do not require us to retreat from the global economy. On the contrary, she shows, an open economy overwhelmingly helps. International trade makes countries richer, raises living standards, benefits consumers, and brings nations together. Global capital mobility helps both borrowers and lenders. International business improves efficiency and fosters innovation. And immigration remains one of America's greatest strengths, as newcomers play an essential role in economic growth, innovation, and entrepreneurship. Closing the door to the benefits of an open economy would cause untold damage. Instead, Clousing outlines a progressive agenda to manage globalization more effectively, presenting strategies to equip workers for a modern economy, improve tax policy, and establish a better partnership between labor and the business community. Accessible, rigorous, and passionate, Open is the book we need to help us navigate the debates currently convulsing national and international economics and politics.

Groundbreaking new research shows that by grabbing hold of the three-step "loop" all habits form in our brains—cue, routine, reward—we can change them, giving us the power to take control over our lives. "We are what we repeatedly do," said Aristotle. "Excellence, then, is not an act, but a habit." On the most basic level, a habit is a simple neurological loop: there is a cue (my mouth feels gross), a routine (hello, Crest), and a reward (ahh, minty fresh). Understanding this loop is the key to exercising regularly or becoming more productive at work or tapping into reserves of creativity. Marketers, too, are learning how to exploit these loops to boost sales; CEOs and coaches are using them to change how employees work and athletes compete. As this book shows, tweaking even one habit, as long as it's the right one, can have staggering effects. In The Power of Habit, award-winning New York Times business reporter Charles Duhigg takes readers inside labs where brain scans record habits as they flourish and die; classrooms in which students learn to boost their willpower; and boardrooms where executives dream up products that tug on our deepest habitual urges. Full of compelling narratives that will appeal to fans of Michael Lewis, Jonah Lehrer, and Chip and Dan Heath, The Power of Habit contains an exhilarating argument: our most basic actions are not the product of well-considered decision making, but of habits we often do not realize exist. By harnessing this new science, we can transform our lives.

Groomed for a place at a Big Name School since their obsessed, status-conscious helicopter parents passed out cigars at the Stockstill General Hospital Neonatal Unit, the privileged students of Pembrocton College Preparatory are ratcheting up the stakes in the race to get into the nation's most prestigious colleges.The PCP juniors are gloating, jubilant at the rumor that the valedictorian presumptive has received a B on her report card, a grade that will relegate her to in-state hell. Her heir apparent, a three-generation Yale legacy, is the sole mourner at the demise of her future—if only because her thoughtless academic lapse is going to derail his plans to attend MIT.Across town, in the graffiti-covered halls of Stockstill High School, the students slink to class, praying that they arrive without a knife wound:and dream of ivy-covered walls. And with the help of a take-no-prisoners principal and an enterprising parent, the students at SHS dare to encroach shamelessly on territory normally reserved for their wealthy private school rivals.?Join the fray as a memorable cast of characters engages in the latest rage in extracurricular activities: college admissions as a blood sport. ??Laugh out loud funny, The Applicants lampoons the heights we scale:and the depths to which we sink:to get into the 'right' college. ?

Provides the final report of the 9/11 Commission detailing their findings on the September 11 terrorist attacks.

Jason Barron spent 516 hours in class, completed mountains of homework and shelled out tens of thousands of dollars to complete his MBA at the BYU Marriott School of Business. Along the way, rather than taking boring notes that he would never read (nor use) again, Jason created sketch notes for each class/visually capturing the essential points of his education/and providing an engaging and invaluable resource. Once finished with his MBA, Jason launched a widely successful Kickstarter campaign distilling these same notes into a self-published book to help aspiring business leaders of all backgrounds and income levels understand the critical concepts one learns in business school. Whether you are thinking about applying to business school, are currently in college studying business, or have always wondered what is taught in an MBA program, this highly entertaining and visual book is for you.

Nature, money, work, care, food, energy, and lives: these are the seven things that have made our world and will shape its future. In making these things cheap, modern commerce has transformed, governed, and devastated Earth. In A History of the World in Seven Cheap Things, Raj Patel and Jason W. Moore present a new approach to analyzing today's planetary emergencies. Bringing the latest ecological research together with histories of colonialism, indigenous struggles, slave revolts, and other rebellions and uprisings, Patel and Moore demonstrate that throughout history, crises have always prompted fresh strategies to make the world cheap and safe for capitalism. At a time of crisis in all seven cheap things, innovative and systemic thinking is urgently required. This book proposes a radical new way of understanding/and reclaiming/the planet in the turbulent twenty-first century.
