God's existence is a human responsibility, which may or may not happen. For John D. Caputo, God's existence is haunted by "perhaps," which does not signify indecisiveness but an openness to risk, to the unforeseeable. Perhaps constitutes a theology of what is to come and what we cannot see coming. Responding to current critics of continental philosophy, Caputo explores the materiality of perhaps and the promise of the world.

It was Caputo's original reading of Derrida that was his most pioneering work, specifically his argument that deconstruction was not a negative or exclusively critical exercise of thought, but instead, that deconstruction is motivated by an affirmative religious passion, and that Derrida can rightfully be read as a religious thinker in his own right.

Caputo's conversational style, full to the brim with metaphor's and puns, is truly enjoyable to read. Its just a great shame that it holds nothing of value intellectually.
