Journal impact factor (JIF) Represents the average citations a document in a journal receives for items published in the previous two years. Shows how highly cited the average document in a journal is relative to others in its discipline. About the Journal Impact Factor (Webcast)

### **Journal ranking tools - Where should I publish ...**

This list provides a simple impact factor, computing a ratio of the number of citations by the number of items in the series. Citation counts are adjusted to exclude citations from the same series. These computations are experimental and based on the citation analysis provided by the CitEc project, which uses data from items listed in RePEc. Only series or journals with 50 or more items are ranked.
