Teaching Mathematics is nothing less than a mathematical manifesto. Arising in response to a limited National Curriculum, and engaged with secondary schooling for those aged 11- 14 (Key Stage 3) in particular, this handbook for teachers will help them broaden and enrich their students' mathematical education. It avoids specifying how to teach, and focuses instead on the central principles and concepts that need to be borne in mind by all teachers and textbook authors—but which are little appreciated in the UK at present. This study is aimed at anyone who would like to think more deeply about the discipline of 'elementary mathematics', in England and Wales and anywhere else. By analysing and supplementing the current curriculum, Teaching Mathematics provides food for thought for all those involved in school mathematics, whether as aspiring teachers or as experienced professionals. It challenges us all to reflect upon what it is that makes secondary school mathematics educationally, culturally, and socially important.

The authors of this book offer practical help to teachers in making day-to-day provision for the able in their classroom. Designed mainly for secondary teachers, teacher educators and senior managers, the book draws together a range of good practice in provision for the most able across all national curriculum subjects. The recommendations for classroom practice are underpinned by sound theoretical perspectives and provide a framework for teachers to evaluate and develop their own provision for able pupils.
