In their journeys to engaged citizenship, civic education is a right for all students, helping them to become active and informed. However, for some students, there are barriers to engagement. It is these barriers that are dealt with in this book. Civic education is a key component of the school curriculum irrespective of country and political system. Ensuring that young people understand the political and social contexts of their country, and indeed their planet, is a key requirement in a rapidly changing and unpredictable world. Providing access to civic learning, therefore, is a priority for schools and the societies in which they are embedded. Yet, for some students, barriers exist which prevent a deep understanding of the requirements for full participation and engagement. These students are neglected not only in schools but in research as well. This book seeks to fill that gap by shining a light on the multiple disadvantages that many students suffer in seeking to exercise their rights as active and informed citizens. The chapters in this book were originally published as a special issue of Educational Psychology.

Many instruments have been developed to measure a myriad of sexuality-related states, traits, behaviors, and outcomes. Few are easily accessible and the information is limited concerning appropriate use and psychometric properties. In Handbook of Sexuality-Related Measures, more than 200 instruments are reproduced, accompanied by the necessary information for their use in research, as well as educational and clinical settings. Measures relating to more than 50 topics are included. Examples are abortion, aging, arousal, general and specific attitudes and behavior, contraception, dysfunctions, education, experience, gender identity, homosexuality, ideology, jealousy, knowledge, masturbation, orgasm, rape, and sexually transmitted diseases. Each chapter describes the development and appropriate use of each instrument, giving information on timing, scoring, and interpretation. Reliability and validity data are summarized and completely referenced. Nearly all articles include the entire instrument; others provide illustrative content from the instrument and give all necessary information to obtain the instrument.
