How the Internet is revitalizing the tradition of "people-to-people" lending - and how entrepreneurs can take advantage of it! Lyn Townshend needed a business loan. But she had no income, having quit her job at IBM. She had a record of credit card delinquencies and had never run a company. Not surprisingly, she was turned down by her bank and the SBA. She joined Prosper.com's cooperative of past and would-be borrowers, posted her loan request, and was funded by 77 people.

In 1679, the French ship Le Griffon mysteriously vanished. Was it lost in a violent storm or robbed of its valuable cargo of furs and set ablaze? No one knows, but historians are quite certain the ship found its final resting place on the bottom of the Great Lakes. Now after centuries of mystery and misinformation, Steve and Kathie Libert reveal that Le Griffonlikely met her final fate among the Huron Islands in Lake Michigan, northeast of Green Bay, Wisconsin. Their research placed her final moments near these islands, precisely where the Liberts discovered a colonial-age shipwreck. Could this be La Salle's Le Griffon? Le Griffon's disappearance became an unsolved mystery for French explorer Robert La Salle, who searched for her whereabouts to no avail. Ironically, if the ship-cursed by local Indian tribes-proves to be Le Griffon, she lays under tribal waters, adding to the mystique of her story. Using primary source documents, the Liberts detail their historical journey of exploration and discovery in solving the first Great Lakes maritime mystery. Many history enthusiasts have patiently waited for this mythical creature to magically raise her eagle head and lioness body from the depths to continue on with her voyage. After nearly 340 years of unanswered questions and more than a dozen unsubstantiated claims of her discovery, Le Griffon can begin to ply the waters - at least in our imaginations.

Digital networks are changing all the rules of business. New, scalable, digitally networked business models, like those of Amazon, Google, Uber, and Airbnb, are affecting growth, scale, and profit potential for companies in every industry. But this seismic shift isn't unique to digital start-ups and tech superstars. Digital transformation is affecting every business sector, and as investor capital, top talent, and customers shift toward network-centric organizations, the performance gap between early and late adopters is widening. So the question isn't whether your organization needs to change, but when and how much. The Network Imperative is a call to action for managers and executives to embrace network-based business models. The benefits are indisputable: companies that leverage digital platforms to co-create and share value with networks of employees, customers, and suppliers are fast outpacing the market. These companies, or network orchestrators, grow faster, scale with lower marginal cost, and generate the highest revenue multipliers. Supported by research that covers fifteen hundred companies, authors Barry Libert, Megan Beck, and Jerry Wind guide leaders and investors through the ten principles that all organizations can use to grow and profit regardless of their industry. They also share a five-step process for pivoting an organization toward a more scalable and profitable business model. The Network Imperative, brimming with compelling case studies and actionable advice, provides managers with what they really need: new tools and frameworks to generate unprecedented value in a rapidly changing age.
