In "The Lives of a Cell", Lewis Thomas dances around the question of what life is, and what it means to be alive. This book is a collection of essays that discuss biology, language, society, and other issues of naturalism and scientific observation that weave together into a rather unique way of looking at the lives of individuals with respect to the others.

*The Lives of a Cell: Notes of a Biology Watcher by Lewis ...*  
The Lives of a Cell: Notes of a Biology Watcher is collection of 29 essays written by Lewis Thomas for the New England Journal of Medicine between 1971 and 1973. Throughout his essays, Thomas touches on subjects as various as biology, anthropology, medicine, music, etymology, mass communication, and computers. The pieces resonate with the underlying theme of the interconnected nature of Earth and all living things.

*The Lives of a Cell: Notes of a Biology Watcher - Wikipedia*  
4.The cell is the unit of life, complete with all its intricate inner workings. The cell membrane (cell wall in plants) is the protective layer that makes this unit of life possible. In the first chapter and frequently throughout, the author wants to think of the earth as a kind of organism, but he can't make it work - too big, too complex, too many working parts without visible connections.

*The Lives of a Cell: Notes of a Biology Watcher: Amazon.co ...*  
The phrase "lives of a cell" refers to the independent yet interrelated parts of a human cell-including mitochondria, centrioles, and basal bodies-that once led independent lives. Without these previously independent lives working together, we would not have the capacity for thought, communication, and movement.

NOTES OF A BIOLOGY WATCHER Lewis Thomas We are told that the trouble with Modern Man is that he has been trying to detach himself from nature. He sits in the topmost tiers of polymer, glass, and steel, dangling his pulsing legs, surveying at a distance the writhing life of the planet.

*THE LIVES OF A CELL*  
Each cell is specialized to have a specific job in the body, working together with other cells and orchestrating the symphony of unconscious, biological processes. A cell is like a little person, surrounded by other little cell people, all communicating in an incredibly complex mini society inside you.

*Secret Life of a Cell (Part 1) - Quantum University*  
The cell (from Latin cella, meaning "small room") is the basic structural, functional, and biological unit of all known organisms.A cell is the smallest unit of life. Cells are often called the "building blocks of life". The study of cells is called cell biology, cellular biology, or cytology.. Cells consist of cytoplasm enclosed within a membrane, which contains many biomolecules such as ...
