Gitman/Joehnk/Smart use practical, hands-on applications to introduce the topics and techniques used by both personal investors and money managers. The authors integrate a consistent framework based on learning goals to keep students focused on what is most important in each chapter. Students leave the course with the necessary information for developing, implementing, and monitoring a successful investment program. The eleventh edition addresses the current financial crisis and the impact it has made on the markets.

The goal of this text is to introduce the business major and particularly the non-finance major to the broad field of finance rather than just corporate finance. Mayo's is one of the only books that attempts coverage of all three major areas of finance, while maintaining a level appropriate for introductory courses in both 2-year and 4-year schools. Since many students will have only this exposure to the subject, the text gives them a working knowledge

of all aspects of introductory finance.

This new international edition provides increased coverage of the procedures for estimating the cost of capital, expanded coverage of risk management techniques and the use and misuse of derivatives, and additional coverage of agency problems.

The core concepts and tools students need to make informed investment decisions.
