Metallurgy is a sub-domain of materials science and engineering that studies the chemical behaviour of metallic elements, their inter-metallic compounds, and their mixtures, which

Get Free Material Science And Metallurgy By Op

are called alloys .

Metallurgy encompasses both the science and the technology of metals. That is, the way in which science is applied to the production of metals, and the engineering of metal components used in products for both consumers and manufacturers.

Originally deriving from the manufacture of ceramics and its putative derivative metallurgy, materials science is one of the oldest forms of engineering and applied science. Modern materials science evolved directly from metallurgy, which itself evolved from mining and (likely) ceramics and the use of fire.
