provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 38. Chapters: Unimog, Mercedes-Benz G-Class, M113 armored personnel carrier, List of World War II military vehicles of Germany, M270 Multiple Launch Rocket System, List of Sd.Kfz. designations, Volkswagen 181, Fennek, Volkswagen Iltis, TH-495, MOWAG Eagle, KMW Grizzly, AGF, Mungo ESK, LAPV Enok, SLT 50 Elefant, DKW Munga, List of currently active German military land vehicles, List of currently active German military watercraft, List of currently active German military aircraft, List of currently active German military helicopters. Excerpt: The Mercedes-Benz G-Class or G-Wagen, short for Gelandewagen (or cross-country vehicle), is a four-wheel drive vehicle / sport utility vehicle (SUV) produced by German automaker Mercedes-

Benz. The G-wagen is characterized by its boxy styling and body-on-frame construction. It utilizes three fully locking differentials, one of the few vehicles to have such a feature. The G-class was developed as a military vehicle and offered as a civilian version in 1979. The G-class replaced the cheaper Volkswagen Iltis in 1990. In this role it is sometimes referred to as the "Wolf" and LAPV Enok. The G-Class has been sold under the Puch name in certain markets, and the Peugeot P4 is a variant made under license, with a Peugeot engine and different parts. Despite the introduction of an intended replacement, the unibody crossover SUV Mercedes-Benz GL-Class in 2006, the G-Class is still produced and is expected to continue in production. An interior face lift is possibly in the works for the G-Class, so there is no set date for when this car will cease production. The G-Wagen was developed by Steyr-Daimler-Puch and first offered for sale in 1979 and redesigned in 1990/1991. A new version was expected for 2007, but the new GL-Class will not replace the G-Wagen, and it will continue to be hand-built in Graz, ...

In the very beginning, the automotive industry was dominated by open-top vehicles whose body shapes were very much based on the horse-drawn carriage, there were open and closed carriages and then there was the Coupe. These were developed from the type of carriage known as the Berlin coach, which was designed as a classic vehicle for individual luxury travel and prestige. This type of

carriage offered an intimate atmosphere focused exclusively on the passengers; it did not even have space for luggage, it simply exuded style, elegance and luxury in every way. This first volume of the Mercedes-Benz Coupe book addresses the journey from what was a functional sports car design to what has become the incomparable Mercedes-Benz 'Sports Coupe'; its timeless body design has remained, even today both a dream car and a dream Coupe to anyone whom aspires to follow in the footsteps of the early individualists who chose style and elegance over practicality. With over 300 photographs and illustrations, this book includes: an overview of the early days of 'Sports-Car' design; the influences of aerodynamics on design evolution; early protagonists at Daimler-Benz and how they influenced design of the Coupe shape; how the Racing Coupe influenced what became the production Sport Coupe; the experimental and one-off prototypes, and finally the continuation of the Super Sport Light concept through the 'S-Class' range.

Ever since their introduction in 1972, the S-Class saloons from Mercedes-Benz have been considered the pinnacle of automotive excellence. For most of that time, ownership of an S-Class - at least, of a reasonably recent one - has been symbolic of material success and of restrained yet impeccable good taste. Several other car makers have nibbled at the edges of the S-Class market, but none has produced a viable and lasting alternative to the big Benz. Mercedes-Benz S-Class 1972-2013 charts the evolution and success of the series, from the W116 model, the first to be

designed from the ground up as a large luxury saloon, through to the C126 coupe, one of the all-time Mercedes-Benz classic designs. Topics covered include: development and production of the W126 saloons and classic W126 coupes; the W140 saloons in the 1990s; the 140 coupes, the W220 models and the elegant 215 coupes; the W221 models, introduced at the Frankfurt International Motor Show in 2005; the C216 coupes and the future of Mercedes-Benz S-Class. Superbly illustrated with 288 colour photographs.

Community is a central idea in urban studies but remains conceptually vague and empirically difficult to work with. Building on existing theories of community, Talja Blokland offers an important contribution to defining and understanding this key theme. Blokland argues that there has been too much focus on community as a stable construct, formed by durable relationships with kin, friends, social groups or neighbours. She draws attention to the non-durable, fluid encounters that constitute community, theorizing communities as shared urban practices in a globalizing world. The book proposes two core ways of thinking about community: the dimension of familiarity, defined by our ability to construct identities, and the dimension of access, defined by our freedom to enter and leave urban spaces. These dimensions form various urban configurations which enable us to experience and practise community in diverse ways. As this book maintains, community is after all an urban practice, not a fixed state of affairs.
