INTRODUCTION

Biopesticide is a formulation made from naturally occurring substances that controls pests by non toxic mechanisms and in ecofriendly manner.

Biopesticides may be derived

Where To Download

from animals

(e.g. nematodes),

plants

(Chrysanthemum,
Azadirachta) and

micro-organisms

(e.g. Bacillus
thuringiensis,

Trichoderma, nuc

5. Biopesticides

Biopesticides - SlideShare

Biopesticides are biological or biologically-derived agents, that are usually applied in a manner similar to chemical pesticides, but

Where To Download

Microbial
Biopesticides

achieve pest management in an environmentally friendly way. With all pest management products, but especially microbial agents, effective control requires appropriate formulation [12]

Where To Download Microbial Biopesticides

[Biopesticide -
Wikipedia](#)

As a form of biological pest control, microbial pesticides are a way of using nature's own biological pest control

Where To Download

mechanisms to
protect plants
from pests and
diseases without
resorting to the
use of
chemicals.

Because they
contain only
natural
substances,
microbial
pesticides are
less toxic than

Where To Download

chemical-based
pesticides.

Microbial Biopesticides

What is
Microbial
Pesticide? -
Definition from
MaximumYield
Biopesticides
are usually
inherently less
toxic than
conventional
pesticides.

Where To Download

Biopesticides
generally affect
only the target
pest and closely
related
organisms, in
contrast to
broad spectrum,
conventional
pesticides that
may affect
organisms as
different as
birds, insects
