We were now flying towards the signals emitted by a German night—fighter’s AI. The technical limitations of Serrate gave us no idea how close or far the aircraft was until we picked up contact on our own AI, but we could tell his relative position to us in space. Flak appeared in the distance and bombers ahead of us were now under attack.

Nightfighter vs nightfighter over Germany

A night fighter is a fighter aircraft adapted for use at night or in other times of bad visibility. Night fighters began to be used in World War I and included types that were specifically modified to operate at night. During Second World War, night fighters were either purpose-built night fighter designs, or more commonly, heavy fighters or light bombers adapted for the mission, often employing radar or other systems for providing some sort of detection capability in low visibility. Many night
