Revised edition of the authors' Understanding psychology, [2016]

A must-read for psychologists—clinical and academic alike—as well as for political scientists, policy analysts, and others working in the realm of terrorism, political violence, and extremism, this book carefully explores the theories, observations, and approaches of authorities in the field and addresses how and why terrorism has perpetuated for so long. • Addresses how various groups are affected by terrorism, including children, older adults, and, arguably more relevant than ever before, refugees • Tackles the perplexing question of why terrorism has remained such a difficult problem to overcome • Includes contributions from Islamic subject matter expert, scholar, and author Dr. Sayed Ammar Nakshawani, listed among The 500 Most Influential Muslims • Serves as appropriate reading for students taking courses in subjects ranging from international psychology, military psychology and theory, political science, and political theory to religious studies, peace studies, military sciences, law enforcement, social work, feminist theory, public health, sociology, and anthropology

The Impact of 9-11 on Psychology and Education is the fifth volume of the six-volume series The Day that Changed Everything? edited by Matthew J. Morgan. It features forewords by Robert Sternberg and Philip Zimbardo.

Tort law regulates most human activities: from driving a car to using consumer products to providing or receiving medical care. Injuries caused by dog bites, slips and falls, fender benders, bridge collapses, adverse reactions to a medication, bar fights, oil spills, and more all implicate the law of torts. The rules and procedures by which tort cases are resolved engage deeply-held intuitions about justice, causation, intentionality, and the obligations that we owe to one another. Tort rules and procedures also generate significant controversy—most visibly in political debates over tort reform. The Psychology of Tort Law explores tort law through the lens of psychological science. Drawing on a wealth of psychological research and their own experiences teaching and researching tort law, Jennifer K. Robbennolt and Valerie P. Hans examine the psychological assumptions that underlie doctrinal rules. They

explore how tort law influences the behavior and decision-making of potential plaintiffs and defendants, examining how doctors and patients, drivers, manufacturers and purchasers of products, property owners, and others make decisions against the backdrop of tort law. They show how the judges and jurors who decide tort claims are influenced by psychological phenomena in deciding cases. And they reveal how plaintiffs, defendants, and their attorneys resolve tort disputes in the shadow of tort law. Robbennolt and Hans here shed fascinating light on the tort system, and on the psychological dynamics which undergird its functioning.

" The book is organized to assist readers in finding the topics that interest them the most. What do we really know about the contributing causes of terrorism? Are all forms of terrorism created equal, or are there important differences in terrorisms that one must know about to customize effective counter-strategies? Does poverty cause terrorism? Are terrorists typically crazy, vengeful, misled, or simply making an entirely sensible choice? Why would people blow themselves (and others) up? Is the war on terrorism even a useful idea? Is it being fought wisely, or are much better ideas staring policy makers in the face? Do leaders of targeted nations wilfully neglect the best solutions? Most of the lessons in this book concern the basic human ingredients that combust to produce violent extremism. Thus regardless of the mutations that occur in substate terrorism the timeless scholarship here will hopefully be somewhat helpful even to our grandchildren. "

"Since human laughter served, in a sense, as Dostoevsky's model, the author pays some heed to the highly controversial subject of real-life laughter, along with the leading theories that seek to elucidate its causes and implications."
