Nrpe Documentation Nagios

The NRPE addon is designed to allow you to execute Nagios plugins on remote Linux/Unix machines. The main reason for doing this is to allow Nagios to monitor "local" resources (like CPU load, memory usage, etc.) on remote machines.

NRPE DOCUMENTATION - Nagios

The documentation provides an excellent over view of how to compile, install and deploy NRPE. I might want to add at the end that you do not want to restart Nagios, but perform a reload. It is cleaner and will not interfere with current operations.

Official NRPE Documentation - Nagios Exchange

Monitoring Hosts Using NRPE This document describes how to monitor hosts with Nagios XI by using NRPE. This document is intended for use by Nagios XI Administrators who want to setup custom monitoring of servers using NRPE or who have existing hosts with the NRPE agent already installed and configured.

Monitoring Hosts Using NRPE - Nagios Library

Nagios Remote Plugin Executor (NRPE) is an agent used by Nagios XI for communicating with remote hosts. Remote hosts are operating systems like Linux and Windows. This KB article explains: How Nagios XI sends requests to the NRPE Agent

NRPE - Agent and Plugin Explained - Nagios Support

The Nagios daemon which run checks on remote machines in NRPE (Nagios Remote Plugin Executor). It allows you to run Nagios plugins on other machines remotely. You can monitor remote machine metrics such as disk usage, CPU load etc. It can also check metrics of remote windows machines through some windows agent addons.

Nagios - NRPE - Tutorialspoint

Enabling NRPE With NSClient++ - Nagios Library

Documentation - NRPE - v3 check_nrpe Config File Configure NRPE Client To Require Certificates While the check_nrpe plugin is sending a certificate, NRPE v3 does not require a certificate unless you update the NRPE configuration file.

NRPE - v3 Enhanced Security - Nagios Support

This document describes how to install and configure NRPE from source for use with Nagios Core/XI. The linux-nrpe-agent that ships with Nagios XI is only supported on CentOS, RHEL, OpenSUSE, SLES, Ubuntu, and Debian. Most monitored environments consist of many different distributions, therefore may need to compile NRPE and its associated plugins.

NRPE - How To Install NRPE v4 From Source - Nagios Support

Nagios® Network Analyzer is a commercial-grade network flow data analysis solution that provides organizations with extended insight into their IT infrastructure and network traffic. Network Analyzer allows you to be proactive in resolving outages, abnormal behavior, and security threats before they affect critical business processes.

Nagios Documentation - Nagios

Nagios Core 3.x. Nagios Core documentation is updated daily. Online (HTML) Manual. NRPE. PDF Manual. NDOUtils. Installation Manual: PDF Manual. Database Design Guide: PDF Manual. Additional Documentation. Additional documentation and technical tips can be found in the Nagios Core documentation and tutorials sections

Nagios Core Manuals - Nagios Library - Nagios Library

This document is intended for Nagios XI administrators who want to monitor hosts using the NRPE agent and configuration wizard to create custom NRPE monitoring configurations. The examples in this documentation require a moderate level of Linux operating system competence.

Purpose Target Audience NRPE Overview - Nagios

Nagios® Network Analyzer is a commercial-grade network flow data analysis solution that provides organizations with extended insight into their IT infrastructure and network traffic. Network Analyzer allows you to be proactive in resolving outages, abnormal behavior, and security threats before they affect critical business processes.

Documentation - Nagios Support Knowledgebase

For installation instructions and information on the design overview of the NRPE addon, please read the PDF documentation that is found in this directory: docs/NRPE.pdf. If you are upgrading from a previous version, you'll want to check the Changelog and then run ./update-cfg.pl to add the new SSL parameters to your config file.

nrpe/README.md at master · NagiosEnterprises/nrpe · GitHub

When it comes to open source network monitoring tools, the World's largest organizations turn to Nagios. Nagios monitors the network for problems caused by overloaded data links or network connections, as well as monitoring routers, switches and more.

Nagios - The Industry Standard In IT Infrastructure Monitoring

Nrpe, or Nagios Remote Plugin Executor, is the client side service of a monitoring setup. The monitoring server will send commands to the client, which listens passively when got no work to do.

How to setup nrpe for client side monitoring - LinuxConfig.org

This document is intended for use by Nagios XI Administrators who want to automate starting, stopping, and restarting of problematic services on their Linux servers. A basic knowledge of NRPE is recommended.

Restarting Linux Services With NRPE - Nagios

NRPE allows Nagios server to remotely execute plugins/commands on Linux/Unix machines and get the result back of the executed command. NRPE is also available with some windows add-ons to monitor windows servers. This article will help you to install NRPE on your CentOS/RHEL 7/6 Systems, which needs to monitor through nagios server.

How To Install NRPE on CentOS/RHEL 7/6 - TecAdmin

The Nagios NRPE configuration is also discussed in the guide above except that, the configuration file for NRPE agent installed from EPEL repos is `/etc/nagios/nrpe.cfg`. That is just it on how to install Nagios NRPE agents on CentOS 8. Hope this guide was informative enough.
