To develop strong disciplinary literacy skills, middle and high school students need to engage with diverse types of challenging texts in every content area. This book provides a blueprint for constructing literacy-rich instructional units in English language arts, science, and social studies. The authors describe how to design interconnected text sets and plan lessons that support learning and engagement before, during, and after reading. Presented are ways to build academic vocabulary and background knowledge, teach research-based comprehension strategies, and guide effective discussions and text-based writing activities. Chapters also cover how to teach students to write argumentative, informative, and narrative essays, and to conduct discipline-specific inquiry. Special features include sample text sets and 24 reproducible planning templates and other teaching tools; purchasers get access to a Web page where they can download and print the reproducible materials in a convenient 8 1/2" x 11" size.

The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions, providing a comprehensive update on research pertaining to new and emerging educational technologies. Chapters that are no longer pertinent have been eliminated in this edition, with most chapters being completely rewritten, expanded, and updated Additionally, new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest. Each chapter now contains an extensive literature review, documenting and explaining the most recent, outstanding research, including major findings and methodologies employed. The Handbook authors continue to be international leaders in their respective fields; the list is cross disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community.

Research Question: How will the use of a graphic organizer affect the overall cohesiveness of sixth grade students' essay writing? Research Activities: The focus of this intervention was to teach students how to use a graphic organizer as a tool to provide structure and organization while writing a problem and solution essay, a genre of writing required by the California Content Standards for sixth grade. Context: This intervention took place in a 6th grade, self-contained classroom with 29 students. Methods and Data: The intervention spanned three consecutive weeks and took 14 days to implement. First, students were introduced to the graphic organizer and created a problem and solution essay as a whole class. Then students used the graphic organizer to create their own problem and solution essay related to a curricular novel. Finally, students used the graphic organizer to write a problem and solution essay on a topic of their choice. Data sets include students' essays before and after having used the graphic organizer. Organization was measured by a rubric score and the "overall cohesiveness" of the essay. An essay was scored as "Cohesive" if it had one main idea, stuck to that main idea throughout the essay, and if information was presented in a logical order. Also, attitudinal data includes teacher notes from a class discussion about writing before and after the intervention. Results: Overall, students' essay organization improved. About 79% of the post-intervention writing samples were scored as "Cohesive," and received higher rubric scores than the pre-intervention writing samples. Students expressed use of graphic organizers made writing more enjoyable and indicated a stronger desire to use graphic organizers as a writing strategy. Grade Level: Sixth Grade. Data Collection Methods: Discussion notes, Observation-Field Notes, Student Work, Survey-Attitude, Writing Samples. Curriculum Areas: Writing. Instructional Approaches: Graphic organizers/concept maps, Writing-Expository, Writing-Rubrics.
