First published in 1981, this book has long been recognized as the ‘ bible of Scalextric ’ , providing a complete catalogue of the cars and equipment produced. Now, for this seventh edition, the book has undergone a transformation, with a complete redesign and masses of new information about cars, sets and accessories produced around the world. As well as extra detail about earlier periods, there is full coverage of all the new Scalextric products launched in the four years that have elapsed since the previous edition. Now containing nearly 1,000 photographs, this book has become an extraordinarily detailed summary of everything in the world of Scalextric, written by an author who has been captivated by the subject for nearly 50 years.

To what extent can we trust photography and science? Robert Zhao Renhui explores these questions in A Guide to the Flora and Fauna of the World, which appears to be an authentic catalogue of plants and animals but is in fact entirely fictitious. Renhui’s guide ostensibly "documents" 55 different animals, plants and environments that have been manipulated by man but do not appear to be, and examines the myriad ways in which humans are altering nature. Here are curious creatures that have evolved in often unexpected ways to cope with our changing world, including rhinoceroses with barely visible horns and monkeys dependent on food handed out by humans. Other organisms in the series are the products of human intervention, mutations engineered to serve various purposes from scientific research to the desire for ornamentation, such as man-made gelatin grapes, genetically modified tomatoes and "unbreakable" eggs. All living things constantly adapt to the various pressures they face including predators, pollution and environmental change. Yet the human species has undeniably emerged as the main perpetrator of the dangers that threaten the survival of other life forms. A Guide to the Flora and Fauna of the World reminds us of this fact, and above all to retain a critical, cautious and ironic attitude to the "real."

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Now there’s a "Grammar Express" designed just for beginning and low-intermediate students! Appropriate for self-study or classroom use, "Grammar Express Basic" uses highly controlled vocabulary, abundant illustrations, and slower pacing to quickly bring students up to speed. The program’s concise, four-page units present and practice grammar points in context, using topics of interest and relevance to learners. Clear grammar charts with explanations, examples, and usage notes illustrate how English speakers use each grammar point. A variety of contextualized exercises progress from simple to more challenging, while frequent opportunities for assessment keep readers on track for success. Additional support includes Appendices with helpful lists and information, an Answer Key, and a Glossary of grammar terms. Interactive CD-ROM provides additional practice including listening and speaking. Workbook extends the Student Book practice with two pages of additional exercises per unit.

This is the story of the Renault Technocentre from its planning stages to its completion, and is a fascinating look at how automobile production, an established industry, can be successfully re-envisioned on a large scale. With numerous aerial shots and double page spreads of inside and outside views, this book is a compelling document of enlightened architecture and systems integration that will engage a multi-disciplinary audience.

How are we as Christians called to respond when cancer invades our lives, whether our own bodies or those of our friends and family? On the eve of his own cancer surgery, John Piper writes about cancer as an opportunity to glorify God. With pastoral sensitivity, compassion, and strength, Piper gently but firmly acknowledges that we can indeed waste our cancer when we don ’ t see how it is God ’ s good plan for us and a hope-filled path for making much of Jesus. Don ’ t Waste Your Cancer is for anyone touched by a life-threatening illness. It first appeared as an appendix in Suffering and the Sovereignty of God. Repackaged and republished, it will serve as a hope-giving resource for healthcare workers, pastors, counselors, and others caring for those with cancer and other serious illnesses. The booklets are also available in packs of ten.

The Chicago columnist offers sarcastic answers to questions on such topics as transportation, the human body, and technology
