When Peter Hessler went to China in the late 1990s, he expected to spend a couple of peaceful years teaching English in the town of Fuling on the Yangtze River. But what he experienced - the natural beauty, cultural tension, and complex process of understanding that takes place when one is thrust into a radically different society - surpassed anything he could have imagined. Hessler observes firsthand how major events such as the death of Deng Xiaoping, the return of Hong Kong to the mainland, and the controversial construction of the Three Gorges Dam have affected even the people of a remote town like Fuling. Poignant, thoughtful and utterly compelling, River Town is an unforgettable portrait of a place caught mid-river in time, much like China itself - a country seeking to understand both what it was and what it will one day become.

Records the author's experiences as a Peace Corps English teacher in the small Chinese city of Fuling, during which time he witnessed such events as the death of Deng Xiaoping and the return of Hong Kong to the mainland.

A New York Times Notable Book Winner of the Kiriya Book Prize In the heart of China's Sichuan province, amid the terraced hills of the Yangtze River valley, lies the remote town of Fuling. Like many other small cities in this ever-evolving country, Fuling is heading down a new path of change and growth, which came into remarkably sharp focus when Peter Hessler arrived as a Peace Corps volunteer, marking the first time in more than half a century that the city had an American resident. Hessler taught English and American literature at the local college, but it was his students who taught him about the complex processes of understanding that take place when one is immersed in a radically different society. Poignant, thoughtful, funny, and enormously compelling, River Town is an unforgettable portrait of a city that is seeking to understand both what it was and what it someday will be.

Idealizing the four years he spent in Malawi with the Peace Corps, Ellis Hock is abruptly divorced by his wife and decides to return to Africa only to find the region devastatingly transformed by poverty and apathy. 35,000 first printing.

Full of unforgettable figures and an unrelenting spirit of adventure, Strange Stones is a far-ranging, thought-provoking collection of Peter Hessler's best reportage—a dazzling display of the powerful storytelling, shrewd cultural insight, and warm sense of humor that are the trademarks of his work. Over the last decade, as a staff writer for The New Yorker and the author of three books, Peter Hessler has lived in Asia and the United States, writing as both native and knowledgeable outsider in these two very different regions. This unusual perspective distinguishes Strange Stones, which showcases Hessler's unmatched range as a storyteller. "Wild Flavor" invites readers along on a taste test between two rat restaurants in South China. One story profiles Yao Ming, basketball star and China's most beloved

export, another David Spindler, an obsessive and passionate historian of the Great Wall. In "Dr. Don," Hessler writes movingly about a small-town pharmacist and his relationship with the people he serves. While Hessler's subjects and locations vary, subtle but deeply important thematic links bind these pieces—the strength of local traditions, the surprising overlap between apparently opposing cultures, and the powerful lessons drawn from individuals who straddle different worlds.

*New Madrid: A Mississippi River Town in History and Legend* focuses on the hearts and minds of a restless population as it moved west into the Mississippi River Valley in the 1800s. The river-port town of New Madrid, Missouri, strategically located just below the junction of the Mississippi and Ohio Rivers, and destined to be the capital of "New Spain," was en route for thousands of early Americans. New Madrid's pioneers reveal their past and their stories through letters, newspapers, official records, and other sources. The author takes the reader through the town's history, recounting tales of legendary people whose lives crossed with those of area residents. Lively illustrations, photographs, and maps enhance the stories, a treasure for anyone whose ancestors experienced the westward movement, participated in the Civil War, were slave-owners, slaves, or American Indians, or for those who are curious about American life in earlier times.

A century ago, outsiders saw China as a place where nothing ever changes. Today the country has become one of the most dynamic regions on earth. In *Oracle Bones*, Peter Hessler explores the human side of China's transformation, viewing modern-day China and its growing links to the Western world through the lives of a handful of ordinary people. In a narrative that gracefully moves between the ancient and the present, the East and the West, Hessler captures the soul of a country that is undergoing a momentous change before our eyes.

An environmental history of the Nashua River, from its discovery by Indians through the polluting years of the Industrial Revolution to the ambitious clean-up that revitalized it.

From the acclaimed author of *Floating in My Mother's Palm* and *Children and Fire*, a stunning story about ordinary people living in extraordinary times—"epic, daring, magnificent, the product of a defining and mesmerizing vision" (Los Angeles Times). Trudi Montag is a Zwerg—a dwarf—short, undesirable, different, the voice of anyone who has ever tried to fit in. Eventually she learns that being different is a secret that all humans share—from her mother who flees into madness, to her friend Georg whose parents pretend he's a girl, to the Jews Trudi harbors in her cellar. Ursula Hegi brings us a timeless and unforgettable story in Trudi and a small town, weaving together a profound tapestry of emotional power, humanity, and truth.

Buried in the bowels of one of the several intelligence agencies in the US government is an office of clandestine medical personnel. Their mission is to analyze the health and mental state of international persons of interest and report their findings to America's policymakers. The team is on call 24/7 to comment on and analyze any written observations, pictures or videos of such persons of interest that may come into the hands of the U.S. government. The goal is to provide timely information to policymakers and negotiators so that the United States of America may achieve maximum success in dealing with the people concerned. Usually this is done in the safe confines of the Agency walls, but sometimes the analysts are forced to place themselves in harms way. Through it all and despite the circumstances, their Code of Honor is to Do No Harm.
