~~research paper ...~~

Research methods are specific procedures for collecting and analyzing data.

Developing your research methods is an integral part of your research design.

When planning your methods, there are two key decisions you will make. First, decide how you will collect data.

~~Research Methods | Definitions, Types,
Examples~~

Experimental research is used to explore cause-and-effect relationships between two or more variables. This type of research involves systematically manipulating an independent variable and then measuring the effect that it has on a defined dependent variable. One of the major advantages of this method is that it allows researchers to actually determine if changes in one variable actually cause changes in another.
