WebDriver sometimes as Selenium 2. Selenium 1.0 + WebDriver = Selenium 2.0

[WebDriver :: Documentation for Selenium](#)

Getting started with WebDriver Selenium supports automation of all the major browsers in the market through the use of WebDriver. WebDriver is an API and protocol that defines a language-neutral interface for controlling the behaviour of web browsers. Each browser is backed by a specific WebDriver implementation, called a driver.

As you know, I am a big fan of Selenium WebDriver. You can find tonnes of useful code in my WebDriver Series. I lead automated testing courses and train people how to write tests all the time. The thing that I felt that is missing in the materials was a sheet containing all of the most relevant code snippets.
